INTRODUCTION

This pamphlet,¹ prepared by the staff of the Joint Committee on Taxation, provides a listing of present Federal excise taxes and tax rates as of April 1, 1987.² The pamphlet also provides data on Federal excise tax receipts, fiscal years 1986–1988. This pamphlet is intended to provide summary information on current Federal excise taxes for Members of the House Committee on Ways and Means, Members of the Senate Committee on Finance, and other Members of Congress.

The most recent Federal excise tax change (the new harbor maintenance tax, sec. 4461) went into effect on April 1, 1987. The revenues from this tax are deposited in the Harbor Maintenance Trust Fund.

The listing of the various current Federal excise taxes (Part I) is organized into 14 categories (including a category of "miscellaneous" excises). The listing includes information as to whether revenues from the particular excise taxes go into a Trust Fund (or other special fund), any scheduled expiration dates or changes in tax rates, and the pertinent sections of the Internal Revenue Code.³ Part II of the pamphlet presents data on Federal excise tax receipts, fiscal years 1986–1988. An Appendix contains tables showing: (1) the excise tax rates on feedstock chemicals (sec. 4661), and (2) the list of taxable substances subject to the excise tax on certain imported (chemical) substances (sec. 4671).

⁸ A net tax of 3 cents per gallon (12 cents/gal. refund or credit) applies to certain privately operated, scheduled intercity buses (sec. 6427(b)).

There is a one-time rebate (credit or refund) to the original purchaser of a qualified diesel-powered car, truck, or van having a gross vehicle weight rating of 10,000 pounds or less. The rebate varies with the model year (only available for post-1978 models) and type of vehicle (higher rebate for a truck or van than for a car). *See also E.3., "Taxes for Leaking Underground Storage Tank Trust Fund," for additional tax of 0.1 cent per gallon on motor fuels (through 1991).

¹⁰ Annual tax: the taxable period is July 1-June 30. Tax liability is incurred as of the first month the vehicle is used during the taxable period. If the first use is after July, the tax is prorated for the taxable period. The tax may be paid in quarterly installments.

The use tax is reduced by 25 percent for vehicles (1) used exclusively in transporting harvested forest products to and from the forested site and which are

required to be registered for that purpose, and (2) registered in Canada or Mexico. (The latter provision is effective on July 1, 1987, as enacted in P.L. 100-17.) There is an exemption for vehicles used fewer than 5,000 miles on public highways during the taxable period (7,500 miles for farm vehicles), and for certain local transit buses. Also, there is a prorated refund of tax for trucks destroyed or stolen during the taxable period.

In addition, under 1984 legislation, the Department of Transportation (in consultation with the Treasury Department) is required to conduct studies of the highway use tax and to submit reports to the Congressional tax-writing committees not later than October 1, 1987, on (1) whether vehicles of 80,000 pounds or more bear their fair share of highway costs, (2) the significance of the use tax for transborder trucking operations, and (3) the feasibility of weight-distance truck taxes.

11 The Airport and Airway Trust Fund taxes are scheduled to expire after

December 31, 1987.

E. Environmental Excise Taxes

1. Excise taxes for Hazardous Substance Superfund (sec. 9507): 12

Crude oil tax (sec. 4611)... 8.2 cents per barrel for domestic crude oil; 11.7 cents per barrel for imported petroleum products. (See also Oil Spill Liability Trust Fund tax, below.)

Tax on feedstock chemicals (sec. 4661).....

Tax on certain imported substances (sec. 4671) 14.....

Generally taxed at the rates that would be applicable to taxable chemicals under sec. 4661. If importer does not furnish adequate information to Treasury to determine tax rate, the rate is to be 5 percent of the value of such imported substance. No tax is to apply to a substance on which a tax is imposed under sec. 4611 or sec. 4661. (See Table 2 in the Appendix for initial list of taxable substances.)

¹² The Superfund also receives revenues from the environmental tax on corporations (sec. 59A), equal to 0.12 percent of the modified alternative minimum taxable income of the corporation in excess of \$2,000,000. This tax applies generally to taxable years beginning after December 31, 1986, and before January 1, 1992 (with an earlier termination as determined below when the Superfund reaches certain levels of unobligated balance or total tax receipts).

The Superfund excise taxes are scheduled to expire after December 31, 1991, or earlier if (1) the Superfund unobligated balance exceeds \$3,500 million at the end of 1989 or 1990, and if the unobligated balance is estimated to exceed this amount at the end of the following year if no Superfund taxes were to be imposed during such year, or (2) when total Superfund tax revenues exceed \$6,650 million (including the sec. 59A tax revenues).

¹³ For periods before 1992, the tax on xylene is \$10.13 per ton, instead of \$4.87.

¹⁴ The excise tax on certain imported substances begins on January 1, 1989, with the same expiration schedule as for the other Superfund taxes.

2. Tax for Oil Spill Liability Trust Fund (sec. 9509):

Crude oil tax (sec. 4611(c)(2)(B)) 15 1.3 cents per barrel.

3. Taxes for Leaking Underground Storage Tank Trust Fund (sec. 9508): 16

Gasoline (sec. 4081(b)(2)

(B)) 0.1 cent per gallon (including aviation).

Other motor fuels (sec.

Fuels used in inland waterways (sec. 4042) 16a.. 0.1 cent per gallon.

F. Crude Oil Windfall Profit Tax (secs. 4986-4998)¹⁷

Tier two oil (stripper oil, 18 Naval Petroleum Reserve

oil)...... 60 percent; 30 percent for independent producer oil.

Tier three oil:

Newly discovered oil 22.5 percent for 1987; 20 percent for 1988; and 15 percent for 1989 and thereafter.

Heavy oil and incremental tertiary oil 30 percent.

¹⁵ The Oil Spill Liability Trust Fund tax rate applies *only* if qualified authorizing legislation is enacted before September 1, 1987. The tax would terminate after December 31, 1991, or earlier if amounts collected exceed \$300 million. (This tax is to be imposed on the same tax base as the Superfund crude oil tax, described in E.1., above.)

16 These taxes are scheduled to expire after December 31, 1991, or earlier if the net revenues from these taxes to the Trust Fund reach \$500 million. (See also C.1., for Highway Trust Fund taxes on motor fuels; D.4., for Airport and Airway Trust Fund taxes on noncommercial aviation fuel; I., for tax on fuels used on inland waterways; and J., for tax on motor boat fuels.)

16a A technical correction to section 4042 is needed to apply this additional tax

¹⁷ The tax rate applies to the "windfall profit" on each barrel of taxable crude oil, as computed under the statute. The windfall profit tax is scheduled to be phased out over a 33-month period beginning after December 1987 or (if later) after the month that the aggregate net windfall profit tax revenues exceed \$227.3 billion, but in no case later than December 1990. (*Note:* Total windfall profit tax revenues are not projected, under existing oil price projections, to reach this maximum by December 1990.)

¹⁸ Qualified independent stripper oil is exempt (sec. 4994(g)).

¹ The tax on feedstock chemicals is scheduled to expire December 31, 1991, or earlier if (1) the Superfund unobligated balance exceeds \$3,500 million at the end of 1989 or 1990, and if the unobligated balance is estimated to exceed this amount at the end of the following year if no Superfund taxes were to be imposed during such year, or (2) when total Superfund tax revenues exceed \$6,650 million (including the sec. 59A tax revenues).

² For periods before 1992, the tax rate for xylene is \$10.13.
