INTRODUCTION

This document,¹ prepared by the staff of the Joint Committee on Taxation, provides a technical explanation of the revenue provisions of H.R. 5893, the “Investing in American Jobs and Closing Tax Loopholes Act of 2010.”

¹ This document may be cited as follows: Joint Committee on Taxation, *Technical Explanation of the Revenue Provisions of H.R. 5893, the “Investing in American Jobs and Closing Tax Loopholes Act of 2010,”* (JCX-39-10), July 29, 2010. This document can also be found on our website at www.jct.gov.

TITLE I – INFRASTRUCTURE INCENTIVES

A. Extension of Build America Bonds (sec. 101 of the bill and sec. 54AA of the Code)

Present Law

Build America Bonds

Section 54AA, added to the Code by the American Recovery and Reinvestment Act of 2009 (“ARRA”),² permits an issuer to elect to have an otherwise tax-exempt bond, issued prior to January 1, 2011, treated as a “Build America Bond.”³ In general, Build America Bonds are taxable governmental bonds, the interest on which is subsidized by the Federal government by means of a tax credit to the holder (“tax-credit Build America Bonds”) or, in the case of certain qualified bonds, a direct payment to the issuer (“direct-pay Build America Bonds”).

Definition and general requirements

A Build America Bond is any obligation (other than a private activity bond) if the interest on such obligation would be (but for section 54AA) excludable from gross income under section 103,⁴ and the issuer makes an irrevocable election to have the rules in section 54AA apply.⁵ In determining if an obligation would be tax-exempt under section 103, the credit (or the payment discussed below for direct-pay Build America Bonds) is not treated as a Federal guarantee.⁶ Further, for purposes of the restrictions on arbitrage in section 148, the yield on a tax-credit Build America Bond is determined without regard to the credit;⁷ the yield on a direct-pay Build America Bond is reduced by the payment made pursuant to section 6431.⁸ A Build America

² Pub. L. No. 111-5.

³ Sec. 54AA.

⁴ Thus, where a bond otherwise satisfies all of the requirements under section 103 to be treated as a tax-exempt bond, it should be possible to issue such bond as a Build America Bond. *C.f.* CCA AM2009-014 (indicating that an Indian tribal government that received an allocation of volume cap pursuant to section 7871(f)(1) to issue Tribal Economic Development Bonds could issue such bonds as Build America Bonds rather than issuing them as tax-exempt bonds under section 103).

⁵ Sec. 54AA(d). Subject to updated IRS reporting forms or procedures, an issuer of Build America Bonds makes the election required by 54AA on its books and records on or before the issue date of such bonds. Notice 2009-26, 2009-16 I.R.B. 833.

⁶ Sec. 54AA(d)(2)(A). Section 149(b) provides that section 103(a) shall not apply to any State or local bond if such bond is federally guaranteed.

⁷ Sec. 54AA(d)(2)(B).

⁸ Sec. 6431(c).

Bond does not include any bond if the issue price has more than a de minimis amount of premium over the stated principal amount of the bond.⁹

Treatment of holders of tax-credit Build America Bonds

The holder of a tax-credit Build America Bond accrues a tax credit in the amount of 35 percent of the interest paid on the interest payment dates of the bond during the calendar year.¹⁰ The interest payment date is any date on which the holder of record of the Build America Bond is entitled to a payment of interest under such bond.¹¹ The sum of the accrued credits is allowed against regular and alternative minimum tax; unused credit may be carried forward to succeeding taxable years.¹² The credit, as well as the interest paid by the issuer, is included in gross income, and the credit may be stripped under rules similar to those provided in section 54A regarding qualified tax credit bonds.¹³ Rules similar to those that apply for S corporations, partnerships and regulated investment companies with respect to qualified tax credit bonds also apply to the credit.¹⁴

Special rules for direct-pay Build America Bonds

Under the special rule for qualified bonds, in lieu of the tax credit to the holder, the issuer is allowed a credit equal to 35 percent of each interest payment made under such bond.¹⁵ A “qualified bond,” that is, a direct-pay Build America Bond, is any Build America Bond issued as part of an issue if 100 percent of the excess of available project proceeds of such issue over the amounts in a reasonably required reserve with respect to such issue are to be used for capital expenditures.¹⁶ Direct-pay Build America Bonds may not be issued to refinance capital

⁹ Sec. 54AA(d)(2)(C).

¹⁰ Sec. 54AA(a) and (b). Original issue discount (“OID”) is not treated as a payment of interest for purposes of determining the credit under the provision. OID is the excess of an obligation’s stated redemption price at maturity over the obligation’s issue price (sec. 1273(a)).

¹¹ Sec. 54AA(e).

¹² Sec. 54AA(c).

¹³ Sec. 54AA(f).

¹⁴ *Ibid.*

¹⁵ Sec. 54AA(g)(1). OID is not treated as a payment of interest for purposes of calculating the refundable credit under the provision.

¹⁶ Sec. 54AA(g). The scope of eligible capital expenditures for Build America Bonds that are qualified bonds under section 54AA(g)(2) generally is intended to be limited to capital expenditures for tangible real or personal property (for example, costs incurred to acquire, construct or improve land, buildings, and equipment) and other similar costs, including those as may be further provided by the Treasury Department in regulations. An example of an eligible capital expenditure would include expenditures made for the purchase of fiber-optic cable to provide municipal broadband service. Eligible capital expenditures for purposes of section 54AA generally do not include expenditures for investment property (as defined for arbitrage purposes in section 148(b)(2)) or for other capitalizable costs of financial assets attributable to prepayments for goods or services (for example, prepayments for electricity or gas).

expenditures in “refunding issues” (as defined in Treas. Reg. sec. 1.150-1)¹⁷ Direct-pay Build America Bonds also must be issued before January 1, 2011. The issuer must make an irrevocable election to have the special rule for qualified bonds apply.¹⁸

The payment by the Secretary is to be made contemporaneously with the interest payment made by the issuer, and may be made either in advance or as reimbursement.¹⁹ In lieu of payment to the issuer, the payment may be made to a person making interest payments on behalf of the issuer.²⁰

Explanation of Provision

The provision extends both types of Build America Bonds through December 31, 2012. For direct-pay Build America Bonds issued in 2011, it provides for a payment to the issuer equal to 32 percent of each interest payment made under such bond. For direct-pay Build America Bonds issued in 2012, the rate for payments to issuers is reduced to 30 percent of each interest payment.

In addition, the provision expands the definition of qualified bond to include a bond issued to effect a current refunding (or series of current refundings) of qualified bonds, provided that (1) the average maturity date of the issue of which the refunding bond is a part is not later than the average maturity date of the bonds to be refunded by such issue, (2) the amount of the refunding bond does not exceed the outstanding amount of the refunded bond, and (3) the refunded bond is redeemed not later than 90 days after the date of the issuance of the refunding bond. For a direct-pay Build America Bond issued to refund another issue of direct-pay Build America Bonds, the provision provides that the payment to the issuer shall be at the lowest rate provided in section 6431 (i.e., 30 percent under the provision).

The provision also reaffirms that Build America Bonds may be used for capital expenditures for levees and other flood control projects.

Effective Date

The provision is effective as of the date of enactment.

¹⁷ Notice 2009-26. In contrast, tax-credit Build America Bonds “may be issued to finance the same kinds of expenditures (e.g., capital expenditures and working capital expenditures) and may involve the same kinds of financings (e.g., original new money financings, current refundings, and one advance refunding) as tax-exempt governmental bonds.” Ibid.

¹⁸ Sec. 54AA(g)(2)(B). Subject to updated IRS reporting forms or procedures, an issuer of direct-pay Build America Bonds makes the election required by 54AA(g)(2)(B) on its books and records on or before the issue date of such bonds. Notice 2009-26, 2009-16 I.R.B. 833.

¹⁹ Sec. 6431.

²⁰ Sec. 6431(b).

**B. Exempt-Facility Bonds for Sewage and Water Supply Facilities
(sec. 102 of the bill and sec. 146 of the Code)**

Present Law

In general

Interest on bonds issued by State and local governments generally is excluded from gross income for Federal income tax purposes if the proceeds of the bonds are used to finance direct activities of these governmental units or if the bonds are repaid with revenues of the governmental units. Interest on State or local bonds issued to finance activities of private persons is taxable unless issued for certain purposes permitted by the Code (“qualified private activity bonds”).²¹

The definition of a qualified private activity bond includes exempt facility bonds, qualified mortgage, veterans’ mortgage, small issue, redevelopment, 501(c)(3), and student loan bonds.²² The definition of an exempt facility bond includes bonds issued to finance certain transportation facilities (airports, ports, mass commuting, and high-speed intercity rail facilities); low-income residential rental property; privately owned and/or operated utility facilities (sewage, water, solid waste disposal, and local district heating and cooling facilities, certain private electric and gas facilities, and hydroelectric dam enhancements); public/private educational facilities; qualified green building/sustainable design projects, qualified hazardous waste facilities, and qualified highway or surface freight transfer facilities.²³ A facility for the furnishing of water will qualify as an exempt facility if: the water is or will be made available to members of the general public (including electric, industrial, agricultural, or commercial users); and either the facilities are (1) operated by a governmental unit or (2) the rates for the furnishing or sale of the water have been established or approved by a State or political subdivision thereof, by an agency or instrumentality of the United States, or by a public service or public utility commission or other similar body of any State or political subdivision thereof.²⁴

Issuance of most qualified private activity bonds is subject (in whole or in part) to annual State volume limitations (“State volume cap”).²⁵ For calendar year 2010, the State volume cap, which is indexed for inflation, equals \$90 per resident of the State, or \$273,775,000, if greater.²⁶

²¹ Sec. 103(b)(1).

²² Sec. 141(e).

²³ Sec. 142(a).

²⁴ Sec. 142(e).

²⁵ Sec. 146.

²⁶ Rev. Proc. 2009-50, 2009-45 I.R.B. 617 (November 9, 2009).

Exceptions from the State volume cap are provided for bonds issued for certain government-owned facilities (airports, ports, certain high-speed intercity rail, and solid waste disposal) and bonds which are subject to separate local, State, or national volume limits (public/private educational facilities, enterprise zone facility bonds, qualified green building/sustainable design projects, and qualified highway or surface freight transfer facility bonds).

If an issuing authority's State volume cap for a calendar year exceeds the aggregate amount of tax-exempt private activity bonds issued during the year, the authority generally may elect to treat all (or any portion) of the excess as a carryforward for one or more specified "carryforward purposes." The issuing authority is required to identify the purpose for which the carryforward is elected and specify the portion of the carryforward which is to be used for that purpose. The Code defines "carryforward purpose" to mean one of four purposes: issuing exempt facility bonds; issuing qualified mortgage bonds or mortgage credit certificates; issuing qualified student loan bonds; and issuing qualified redevelopment bonds.²⁷ A carryforward of unused State volume cap is valid for three years.

Many States have State revolving fund programs ("SRFs") to finance wastewater and drinking water projects. SRFs are pools of capital dedicated to financing public infrastructure formed through Federal and state contributions. SRFs use Federal grants to make loans to local governments to finance the construction of water facilities and to establish debt service reserve funds for bonds the proceeds of which are so be used to make such loans. Although present law generally prohibits the Federal guarantee of tax-exempt bonds,²⁸ the IRS has ruled that States may use Federal grants to fund debt service reserve funds for tax-exempt bonds issued to finance SRF loans without affecting the tax-exempt status of such bonds.²⁹

Indian tribal governments

Under present law, gross income does not include interest on State or local bonds.³⁰ State and local bonds are classified generally as either governmental bonds or private activity bonds. Governmental bonds are bonds the proceeds of which are primarily used to finance governmental facilities or that are repaid with governmental funds. Private activity bonds are bonds in which the State or local government serves as a conduit providing financing to nongovernmental persons. For these purposes, the term "nongovernmental person" includes the Federal government and all other individuals and entities other than States or local

²⁷ Sec. 146(f)(5).

²⁸ Sec. 149(b).

²⁹ Notice 88-54, 1988-1 C.B. 539.

³⁰ Sec. 103.

governments.³¹ Interest on private activity bonds is taxable, unless the bonds are issued for certain purposes permitted by the Code and other requirements are met.³²

Although not States or subdivisions of States, Indian tribal governments are provided with a tax status similar to State and local governments for specified purposes under the Code.³³ Among the purposes for which a tribal government is treated as a State is the issuance of tax-exempt bonds. Under section 7871(c), tribal governments are authorized to issue tax-exempt bonds only if substantially all of the proceeds are used for essential governmental functions.³⁴ The term essential governmental function does not include any function that is not customarily performed by State and local governments with general taxing powers. Section 7871(c) further prohibits Indian tribal governments from issuing tax-exempt private activity bonds (as defined in section 141(a) of the Code) with the exception of certain bonds for manufacturing facilities.

Explanation of Provision

The provision provides that tax-exempt bonds issued to finance privately used or operated facilities for the furnishing of water or sewage facilities are not subject to the State volume caps.³⁵

Also, the provision allows Indian tribal governments to issue tax-exempt private activity bonds for two additional types of facilities. These new facilities are facilities for the furnishing of water³⁶ and sewerage facilities.³⁷ These bonds are not subject to the private activity bond volume limitation, nor the essential government function test.

Effective Date

The provision is effective for bonds issued after the date of enactment.

³¹ Sec. 141(b)(6); Treas. Reg. sec. 1.141-1(b).

³² Secs. 103(b)(1) and 141.

³³ Sec. 7871.

³⁴ Sec. 7871(c).

³⁵ To the extent an issuer previously designated facilities for the furnishing of water or sewerage facilities when the issuer elected to carry-forward unused volume cap, the issuer shall be allowed to designate another carry-forward purpose in a time and manner provided under guidance from the Secretary of the Treasury.

³⁶ Sec. 142(a)(4).

³⁷ Sec. 142(a)(5).

**C. Extension of Exemption from Alternative Minimum Tax Treatment
for Certain Tax-Exempt Bonds
(sec. 103 of the bill and sec. 57 of the Code)**

Present Law

Present law imposes an alternative minimum tax (“AMT”) on individuals and corporations. AMT is the amount by which the tentative minimum tax exceeds the regular income tax. The tentative minimum tax is computed based upon a taxpayer’s alternative minimum taxable income (“AMTI”). AMTI is the taxpayer’s taxable income modified to take into account certain preferences and adjustments. One of the preference items is tax-exempt interest on certain tax-exempt bonds issued for private activities (sec. 57(a)(5)). Also, in the case of a corporation, an adjustment based on current earnings is determined, in part, by taking into account 75 percent of items, including tax-exempt interest, that are excluded from taxable income but included in the corporation’s earnings and profits (sec. 56(g)(4)(B)).

The American Recovery and Reinvestment Act of 2009 provided that tax-exempt interest on private activity bonds issued in 2009 and 2010 is not an item of tax preference for purposes of the alternative minimum tax and interest on tax exempt bonds issued in 2009 and 2010 is not included in the corporate adjustment based on current earnings. For these purposes, a refunding bond is treated as issued on the date of the issuance of the refunded bond (or in the case of a series of refundings, the original bond).

The Act also provided that tax-exempt interest on private activity bonds issued in 2009 and 2010 to currently refund a private activity bond issued after December 31, 2003, and before January 1, 2009, is not an item of tax preference for purposes of the alternative minimum tax. Also, tax-exempt interest on bonds issued in 2009 and 2010 to currently refund a bond issued after December 31, 2003, and before January 1, 2009, is not included in the corporate adjustment based on current earnings.

Explanation of Provision

The provision extends the minimum tax treatment of interest on tax-exempt bonds provided by the American Recovery and Reinvestment Act of 2009 to bonds issued in 2011.

Effective Date

The provision applies to interest on bonds issued after December 31, 2010.

**D. Extension and Additional Allocations of Recovery Zone Bond Authority
(sec. 104 of the bill and sec. 1400U-2-1400U-3 of the Code)**

Present Law

In general

Issuers may issue recovery zone economic development bonds and recovery zone facility bonds with respect to a recovery zone. A recovery zone is (1) any area designated by an issuer as having significant poverty, unemployment, rate of home foreclosures, or general distress; (2) any area designated by the issuer as economically distressed by reason of the closure or realignment of a military installation pursuant to the Defense Base Closure and Realignment Act of 1990, or (3) any area for which a designation as an empowerment zone or renewal community is in effect.

There is a national recovery zone economic development bond limitation of \$10 billion. In addition, there is a separate national recovery zone facility bond limitation of \$15 billion. Present law requires that the Secretary allocate these bond limitations among the States in the proportion that each State's employment decline bears to the national decline in employment (the aggregate 2008 State employment declines for all States). The allocations are adjusted to the extent necessary to ensure that no State receives less than 0.9 percent of each recovery zone bond limitation.

In turn, each State is to reallocate its allocation among the counties (parishes) and large municipalities in such State in the proportion that each such county or municipality's 2008 employment decline bears to the aggregate employment declines for all counties and municipalities in such State. In calculating the local employment decline with respect to a county, the portion of such decline attributable to a large municipality is disregarded for purposes of determining the county's portion of the State employment decline and is attributable to the large municipality only.

The "2008 State employment decline" means, with respect to any State, the excess (if any) of (i) the number of individuals employed in such State as determined for December 2007, over (ii) the number of individuals employed in such State as determined for December 2008. The term "large municipality" means a municipality with a population of more than 100,000.

Recovery zone economic development bonds

A recovery zone economic development bond is a Build America Bond (a type of taxable governmental bond) that entitles the issuer of such bonds to receive a refundable tax credit (payment) equal to 45 percent of the interest payable on an interest payment date.

A recovery zone economic development bond is a Build America Bond issued as part of an issue if 100 percent of the available project proceeds of such issue are to be used for one or more qualified economic development purposes and the issuer designates such bond as a recovery zone economic development bond. A qualified economic development purpose means expenditures for purposes of promoting development or other economic activity in a recovery zone, including (1) capital expenditures paid or incurred with respect to property located in such

zone, (2) expenditures for public infrastructure and construction of public facilities located in a recovery zone and (3) expenditures for job training and educational programs.

The aggregate face amount of bonds which may be designated by any issuer cannot exceed the amount of the recovery zone economic development bond limitation allocated to such issuer. Recovery zone economic development bonds must be issued before January 1, 2011.

Recovery zone facility bonds

A recovery zone facility bond is any bond issued as part of an issue if: (1) 95 percent or more of the net proceeds of such issue are to be used for recovery zone property and (2) such bond is issued before January 1, 2011, and (3) the issuer designates such bond as a recovery zone facility bond. The aggregate face amount of bonds which may be designated by any issuer cannot exceed the amount of the recovery zone facility bond limitation allocated to such issuer.

Under the provision, the term “recovery zone property” means any property subject to depreciation to which section 168 applies (or would apply but for section 179) if (1) such property was acquired by the taxpayer by purchase after the date on which the designation of the recovery zone took effect; (2) the original use of such property in the recovery zone commences with the taxpayer; and (3) substantially all of the use of such property is in the recovery zone and is in the active conduct of a qualified business by the taxpayer in such zone. The term “qualified business” means any trade or business except that the rental to others of real property located in a recovery zone shall be treated as a qualified business only if the property is not residential rental property (as defined in section 168(e)(2)) and does not include any trade or business consisting of the operation of any facility described in section 144(c)(6)(B) (i.e., any private or commercial golf course, country club, massage parlor, hot tub facility, suntan facility, racetrack or other facility used for gambling, or any store the principal purpose of which is the sale of alcoholic beverages for consumption off premises).

Subject to the following exceptions and modifications, issuance of recovery zone facility bonds is subject to the general rules applicable to issuance of qualified private activity bonds:

1. Issuance of the bonds is not subject to the aggregate annual State private activity bond volume limits (sec. 146);
2. The restriction on acquisition of existing property does not apply (sec. 147(d));

Explanation of Provision

The provision extends for one additional year the period for issuing recovery zone economic development bonds and recovery zone facility bonds (through December 31, 2011).

The provision provides for a second allocation of \$10 billion of recovery zone economic development bonds and \$15 billion of recovery zone facility bonds. This second allocation is made in the proportion that each State’s 2009 unemployment number bears to the aggregate of the 2009 unemployment numbers for all States. The second round of allocations is adjusted to the extent necessary to ensure that no State receives less than 0.9 percent of each recovery zone bond limitation, before the reduction discussed below.

Similar to present law, each State is to reallocate its allocation among the counties (parishes) and large municipalities in such State in the proportion that each such county or municipality's 2009 unemployment number bears to the aggregate 2009 unemployment number for all counties and municipalities in such State. In the case of any large municipality, any portion of which is in a county, such portion is treated as part of the municipality and not part of the county.

A State is required to reduce, but not below zero, each allocation to a county or large municipality by the amount of the first (present law) recovery zone economic development bond allocation. Similarly, each county or large municipality's second allocation of recovery zone facility bond allocation is reduced, but not below zero, by the amount of the first recovery zone facility bond allocation. These reductions are made without regard to any waiver of allocation made by the county or large municipality. For purposes of the limitations on the amount of bonds that may be designated, any amount of the national allocation that is not allocated by a State to a county or large municipality as a result of such reduction shall be treated as not allocated to any issuer, including the State itself.

Under present law and under the bill, a county or municipality may waive any portion of an allocation made to it. The provision further provides that a county or municipality is deemed to waive back to the State the portion of an allocation made to a county or municipality that is not used to issue bonds by May 1, 2011. This rule applies to all allocations, including the first round of allocations made in 2009. No negative inference is intended regarding State laws enacted prior to the date of enactment which deem a county or municipality's allocation waived before May 1, 2011. Any waived allocation may be used or reallocated by the State.

The term "2009 unemployment number" means, with respect to any State, county or municipality, the number of individuals in such State, county, or municipality who were determined to be unemployed by the Bureau of Labor Statistics for December 2009.

Effective Date

The provision is effective on the date of enactment.

**E. Allow the New Markets Tax Credit for Purposes of the Alternative Minimum Tax
(sec. 105 of the bill and sec. 38 of the Code)**

Present Law

Present law imposes an alternative minimum tax (“AMT”) on individuals. The AMT is the amount by which the tentative minimum tax exceeds the regular income tax.³⁸ An individual’s tentative minimum tax is an amount equal to specified rates of tax imposed on the excess of the alternative minimum taxable income over an exemption amount. To the extent the tentative minimum tax exceeds the regular tax, a taxpayer is subject to the alternative minimum tax.

The new markets tax credit cannot be used offset AMT liability because business tax credits generally may not exceed the excess of the taxpayer’s income tax liability over the tentative minimum tax (or, if greater, 25 percent of the regular tax liability in excess of \$25,000). Credits not allowed may be carried back one year and carried over for up to 20 years.

Explanation of Provision

The provision treats the tentative minimum tax as being zero for purposes of determining the tax liability limitation with respect to the new markets tax credit.

Thus, the new markets tax credit may offset the alternative minimum tax liability. The provision is not effective for qualified equity investments made after December 31, 2011.

Effective Date

The provision applies to qualified equity investments (as defined in section 45D(b)) initially made after March 15, 2010.

³⁸ Sec. 55(a).

**F. Extension of Tax-Exempt Eligibility for Loans Guaranteed
by Federal Home Loan Banks
(sec. 106 of the bill and sec. 149 of the Code)**

Present Law

In general

Interest paid on bonds issued by State and local governments generally is excluded from gross income for Federal income tax purposes. However, the exclusion generally does not apply to State and local bonds that are Federally guaranteed. Under present law, a bond is Federally guaranteed if: (1) the payment of principal or interest with respect to such bond is guaranteed (in whole or in part) by the United States (or any agency or instrumentality thereof); (2) such bond is issued as part of an issue and five percent or more of the proceeds of such issue is to be (a) used in making loans the payment of principal or interest with respect to which is guaranteed (in whole or in part) by the United States (or any agency or instrumentality thereof), or (b) invested directly or indirectly in Federally insured deposits or accounts; or (3) the payment of principal or interest on such bond is otherwise indirectly guaranteed (in whole or in part) by the United States (or any agency or instrumentality thereof).

The Federal guarantee restriction was enacted in 1984 with certain exceptions for certain guarantee programs in existence at that time. The exceptions include guarantees by: the Federal Housing Administration; the Department of Veterans' Affairs; the Federal National Mortgage Association; the Federal Home Loan Mortgage Association; the Government National Mortgage Association; the Student Loan Marketing Association; and the Bonneville Power Authority. The exception also includes guarantees for certain housing programs. These are: (a) private activity bonds for a qualified residential rental project or a housing program obligation under section 11(b) of the United States Housing Act of 1937; (b) a qualified mortgage bond; or (c) a qualified veterans' mortgage bond.

Special rule for the Federal Home Loan Bank

Under a special rule, bonds issued by State and local governments are not treated as Federally guaranteed by reason of any guarantee provided by any Federal Home Loan Bank of a bond issued after the date of enactment and before January 1, 2011, if such bank made a guarantee of such bond in connection with such issuance.

This exception to the Federal guarantee prohibition does not apply to any guarantee by a Federal home loan bank unless such bank meets safety and soundness collateral requirements for such guarantees which are at least as stringent as the regulatory requirements for guarantees by Federal home loan banks as in effect on April 9, 2008.

Explanation of Provision

The provision provides a one-year extension (through December 31, 2011) of the special rule for Federal Home Loan Bank.

Effective Date

The provision applies to guarantees made after December 31, 2010.

**G. Extension of Temporary Modification of Small Issuer Rules for Allocation
of Tax-Exempt Interest Expense by Financial Institutions
(sec. 107 of the bill and sec. 265 of the Code)**

Present Law

In general

Present law disallows a deduction for interest on indebtedness incurred or continued to purchase or carry obligations the interest on which is exempt from tax.³⁹ In general, an interest deduction is disallowed only if the taxpayer has a purpose of using borrowed funds to purchase or carry tax-exempt obligations; a determination of the taxpayer's purpose in borrowing funds is made based on all of the facts and circumstances.⁴⁰

Exception for certain obligations of qualified small issuers

The general rule in section 265(b), denying financial institutions' interest expense deductions allocable to tax-exempt obligations, does not apply to "qualified tax-exempt obligations."⁴¹ Instead, as discussed in the next section, only 20 percent of the interest expense allocable to "qualified tax-exempt obligations" is disallowed.⁴² A "qualified tax-exempt obligation" is a tax-exempt obligation that (1) is issued after August 7, 1986, by a qualified small issuer, (2) is not a private activity bond, and (3) is designated by the issuer as qualifying for the exception from the general rule of section 265(b).

A "qualified small issuer" is an issuer that reasonably anticipates that the amount of tax-exempt obligations that it will issue during the calendar year will be \$10 million or less.⁴³ The Code specifies the circumstances under which an issuer and all subordinate entities are aggregated.⁴⁴ For purposes of the \$10 million limitation, an issuer and all entities that issue obligations on behalf of such issuer are treated as one issuer. All obligations issued by a subordinate entity are treated as being issued by the entity to which it is subordinate. An entity formed (or availed of) to avoid the \$10 million limitation and all entities benefiting from the device are treated as one issuer.

Composite issues (i.e., combined issues of bonds for different entities) qualify for the "qualified tax-exempt obligation" exception only if the requirements of the exception are met with respect to (1) the composite issue as a whole (determined by treating the composite issue as

³⁹ Sec. 265(a).

⁴⁰ See Rev. Proc. 72-18, 1972-1 C.B. 740.

⁴¹ Sec. 265(b)(3).

⁴² Secs. 265(b)(3)(A), 291(a)(3) and 291(e)(1).

⁴³ Sec. 265(b)(3)(C).

⁴⁴ Sec. 265(b)(3)(E).

a single issue) and (2) each separate lot of obligations that is part of the issue (determined by treating each separate lot of obligations as a separate issue).⁴⁵ Thus a composite issue may qualify for the exception only if the composite issue itself does not exceed \$10 million, and if each issuer benefitting from the composite issue reasonably anticipates that it will not issue more than \$10 million of tax-exempt obligations during the calendar year, including through the composite arrangement.

Treatment of financial institution preference items

Section 291(a)(3) reduces by 20 percent the amount allowable as a deduction with respect to any financial institution preference item. Financial institution preference items include interest on debt to carry tax-exempt obligations acquired after December 31, 1982, and before August 8, 1986.⁴⁶ Section 265(b)(3) treats qualified tax-exempt obligations as if they were acquired on August 7, 1986. As a result, the amount allowable as a deduction by a financial institution with respect to interest incurred to carry a qualified tax-exempt obligation is reduced by 20 percent.

Special rule for 2009 and 2010

Modifications to qualified small issuer exception

With respect to tax-exempt obligations issued during 2009 and 2010, the special rule increases from \$10 million to \$30 million the annual limit for qualified small issuers.

In addition, in the case of “qualified financing issue” issued in 2009 or 2010, the special rule applies the \$30 million annual volume limitation at the borrower level (rather than at the level of the pooled financing issuer). Thus, for the purpose of applying the requirements of the section 265(b)(3) qualified small issuer exception, the portion of the proceeds of a qualified financing issue that are loaned to a “qualified borrower” that participates in the issue are treated as a separate issue with respect to which the qualified borrower is deemed to be the issuer.

A “qualified financing issue” is any composite, pooled or other conduit financing issue the proceeds of which are used directly or indirectly to make or finance loans to one or more ultimate borrowers all of whom are qualified borrowers. A “qualified borrower” means (1) a State or political subdivision of a State or (2) an organization described in section 501(c)(3) and exempt from tax under section 501(a). Thus, for example, a \$100 million pooled financing issue that was issued in 2009 could qualify for the section 265(b)(3) exception if the proceeds of such issue were used to make four equal loans of \$25 million to four qualified borrowers. However, if (1) more than \$30 million were loaned to any qualified borrower, (2) any borrower were not a qualified borrower, or (3) any borrower would, if it were the issuer of a separate issue in an amount equal to the amount loaned to such borrower, fail to meet any of the other requirements

⁴⁵ Sec. 265(b)(3)(F).

⁴⁶ Sec. 291(e)(1).

of section 265(b)(3), the entire \$100 million pooled financing issue would fail to qualify for the exception.

For purposes of determining whether an issuer meets the requirements of the small issuer exception, qualified 501(c)(3) bonds issued in 2009 or 2010 are treated as if they were issued by the 501(c)(3) organization for whose benefit they were issued (and not by the actual issuer of such bonds). In addition, in the case of an organization described in section 501(c)(3) and exempt from taxation under section 501(a), requirements for “qualified financing issues” shall be applied as if the section 501(c)(3) organization were the issuer. Thus, in any event, an organization described in section 501(c)(3) and exempt from taxation under section 501(a) shall be limited to the \$30 million per issuer cap for qualified tax exempt obligations described in section 265(b)(3).

Explanation of Provision

The provision extends the temporary modifications to the qualified small issuer exception for one additional year (through 2011).

Effective Date

The provision is effective for obligations issued after December 31, 2010.

TITLE III – FOREIGN PROVISIONS

A. Rules to Prevent Splitting Foreign Tax Credits From the Income to Which They Relate (sec. 301 of the bill and new sec. 909 of the Code)

Present Law

The United States employs a worldwide tax system under which U.S. resident individuals and domestic corporations generally are taxed on all income, whether derived in the United States or abroad; the foreign tax credit provides relief from double taxation. Subject to the limitations discussed below, a U.S. taxpayer is allowed to claim a credit against its U.S. income tax liability for the foreign income taxes that it pays or accrues. A domestic corporation that owns at least 10 percent of the voting stock of a foreign corporation is allowed a deemed-paid credit for foreign income taxes paid by the foreign corporation that the domestic corporation is deemed to have paid when the foreign corporation's earnings are distributed or included in the domestic corporation's income under the provisions of subpart F.⁴⁷

A foreign tax credit is available only for foreign income, war profits, and excess profits taxes, and for certain taxes imposed in lieu of such taxes.⁴⁸ Other foreign levies generally are treated as deductible expenses. Treasury regulations under section 901 provide detailed rules for determining whether a foreign levy is a creditable income tax.

The foreign tax credit is elective on a year-by-year basis. In lieu of electing the foreign tax credit, U.S. persons generally are permitted to deduct foreign taxes.⁴⁹

Deemed-paid foreign tax credit

Domestic corporations owning at least 10 percent of the voting stock of a foreign corporation are treated as if they had paid a share of the foreign income taxes paid by the foreign corporation in the year in which that corporation's earnings and profits become subject to U.S. tax as dividend income of the U.S. shareholder.⁵⁰ This credit is the deemed-paid or indirect foreign tax credit. A domestic corporation may also be deemed to have paid taxes paid by a second-, third-, fourth-, fifth-, or sixth-tier foreign corporation, if certain requirements are satisfied.⁵¹ Foreign taxes paid below the third tier are eligible for the deemed-paid credit only with respect to taxes paid in taxable years during which the payor is a controlled foreign

⁴⁷ Secs. 901, 902, 960. Similar rules apply under sections 1291(g) and 1293(f) with respect to income that is includible under the passive foreign investment company ("PFIC") rules.

⁴⁸ Secs. 901(b), 903.

⁴⁹ Sec. 164(a)(3).

⁵⁰ Sec. 902(a).

⁵¹ Sec. 902(b).

corporation (“CFC”). Foreign taxes paid below the sixth tier are not eligible for the deemed-paid credit. In addition, a deemed-paid credit generally is available with respect to subpart F inclusions and inclusions under the PFIC provisions.⁵²

The amount of foreign tax eligible for the indirect credit is added to the actual dividend or inclusion (the dividend or inclusion is said to be “grossed-up”) and is included in the domestic corporate shareholder’s income; accordingly, the shareholder is treated as if it had received its proportionate share of pre-tax profits of the foreign corporation and paid its proportionate share of the foreign tax paid by the foreign corporation.⁵³

For purposes of computing the deemed-paid foreign tax credit, dividends (or other inclusions) are considered made first from the post-1986 pool of all the distributing foreign corporation’s accumulated earnings and profits.⁵⁴ Accumulated earnings and profits for this purpose include the earnings and profits of the current year undiminished by the current distribution (or other inclusion).⁵⁵ Dividends in excess of the pool of post-1986 undistributed earnings and profits are treated as paid out of pre-1987 accumulated profits and are subject to the ordering principles of pre-1986 Act law.⁵⁶

Foreign tax credit limitation

The foreign tax credit generally is limited to a taxpayer’s U.S. tax liability on its foreign-source taxable income (as determined under U.S. tax accounting principles).⁵⁷ This limit is intended to ensure that the credit serves its purpose of mitigating double taxation of foreign-source income without offsetting U.S. tax on U.S.-source income. The limit is computed by multiplying a taxpayer’s total U.S. tax liability for the year by the ratio of the taxpayer’s foreign-source taxable income for the year to the taxpayer’s total taxable income for the year. If the total amount of foreign income taxes paid and deemed paid for the year exceeds the taxpayer’s foreign tax credit limitation for the year, the taxpayer may carry back the excess foreign taxes to the previous taxable year or carry forward the excess taxes to one of the succeeding 10 taxable years.⁵⁸

The foreign tax credit limitation is generally applied separately for income in two different categories (referred to as “baskets”), passive basket income and general basket

⁵² Secs. 960(a), 1291(g), 1293(f).

⁵³ Sec. 78.

⁵⁴ Sec. 902(c)(6)(B). Earnings and profits computations for these purposes are to be made under U.S. concepts. Secs. 902(c)(1), 964(a).

⁵⁵ Sec. 902(c)(1).

⁵⁶ Sec. 902(c)(6).

⁵⁷ Secs. 901, 904.

⁵⁸ Sec. 904(c).

income.⁵⁹ Passive basket income generally includes investment income such as dividends, interest, rents, and royalties.⁶⁰ General basket income is all income that is not in the passive basket. Because the foreign tax credit limitation must be applied separately to income in these two baskets, credits for foreign tax imposed on income in one basket cannot be used to offset U.S. tax on income in the other basket.

Income that would otherwise constitute passive basket income is treated as general basket income if it is earned by a qualifying financial services entity (and certain other requirements are met).⁶¹ Passive income is also treated as general basket income if it is high-taxed income (i.e., if the foreign tax rate is determined to exceed the highest rate of tax specified in section 1 or 11, as applicable).⁶² Dividends (and subpart F inclusions), interest, rents, and royalties received from a CFC by a U.S. person that owns at least 10 percent of the CFC are assigned to a separate limitation basket by reference to the basket of income out of which the dividend or other payment is made.⁶³ Dividends received by a 10-percent corporate shareholder from a foreign corporation that is not a CFC are also categorized on a look-through basis.⁶⁴

Explanation of Provision

The provision adopts a matching rule to prevent the separation of creditable foreign taxes from the associated foreign income. In general, the provision states that when there is a foreign tax credit splitting event with respect to a foreign income tax paid or accrued by the taxpayer, such tax is not taken into account for purposes of the Code before the taxable year in which the related income is taken into account by the taxpayer under chapter 1 of the Code. In addition, if there is a foreign tax credit splitting event with respect to a foreign income tax paid or accrued by a section 902 corporation, that tax is not taken into account for purposes of section 902 or 960, or for purposes of determining earnings and profits under section 964(a), before the taxable year in which the related income is taken into account under chapter 1 of the Code by the section 902 corporation, or a domestic corporation that meets the ownership requirements of section 902(a)

⁵⁹ Sec. 904(d). Separate foreign tax credit limitations also apply to certain categories of income described in other sections. See, e.g., secs. 901(j), 904(h)(10), 865(h).

⁶⁰ Sec. 904(d)(2)(B). Passive income is defined by reference to the definition of foreign personal holding company income in section 954(c), and thus generally includes dividends, interest, rents, royalties, annuities, net gains from certain property or commodities transactions, foreign currency gains, income equivalent to interest, income from notional principal contracts, and income from certain personal service contracts. Exceptions apply for certain rents and royalties derived in an active business and for certain income earned by dealers in securities or other financial instruments. Passive category income also includes amounts that are includible in gross income under section 1293 (relating to PFICs) and dividends received from certain DISCs and FSCs.

⁶¹ Sec. 904(d)(2)(C), (D).

⁶² Sec. 904(d)(2)(F).

⁶³ Sec. 904(d)(3).

⁶⁴ Sec. 904(d)(4).

or (b) with respect to the section 902 corporation. Thus, such tax is not added to the section 902 corporation's foreign tax pool, and its earnings and profits are not reduced by such tax.

In the case of a partnership, the provision's matching rule is applied at the partner level, and, except as otherwise provided by the Secretary, a similar rule applies in the case of any S corporation or trust. The Secretary may also issue regulations to establish the applicability of this matching rule to a regulated investment company that elects under section 853 for the foreign income taxes it pays to be treated as creditable to its shareholders under section 901.

For purposes of the provision, there is a "foreign tax credit splitting event" with respect to a foreign income tax if the related income is (or will be) taken into account under chapter 1 of the Code by a covered person.⁶⁵ A "foreign income tax" is any income, war profits, or excess profits tax paid or accrued to any foreign country or to any possession of the United States. This term includes any tax paid in lieu of such a tax within the meaning of section 903. "Related income" means, with respect to any portion of any foreign income tax, the income (or, as appropriate, earnings and profits), calculated under U.S. tax principles, to which such portion of foreign income tax relates. For purposes of determining related income, the Secretary may provide rules on the treatment of losses, deficits in earnings and profits, and certain timing differences between U.S. and foreign tax law. Moreover, it is not intended that differences in the timing of when income is taken into account for U.S. and foreign tax purposes (e.g., as a result of differences in the U.S. and foreign tax accounting rules) should create a foreign tax credit splitting event in cases in which the same person pays the foreign tax and takes into account the related income, but in different taxable periods.

With respect to any person who pays or accrues a foreign income tax (hereafter referred to in this paragraph as the "payor"), a "covered person" is: (1) any entity in which the payor holds, directly or indirectly, at least a 10-percent ownership interest (determined by vote or value); (2) any person that holds, directly or indirectly, at least a 10-percent ownership interest (determined by vote or value) in the payor; (3) any person that bears a relationship to the payor described in section 267(b) or 707(b) (including by application of the constructive ownership rules of section 267(c)); and (4) any other person specified by the Secretary. Accordingly, the Secretary may issue regulations that treat an unrelated counterparty as a covered person in certain sale-repurchase transactions and certain other transactions deemed abusive.

A "section 902 corporation" is any foreign corporation with respect to which one or more domestic corporations meets the ownership requirements of section 902(a) or (b).

Except as otherwise provided by the Secretary, in the case of any foreign income tax not currently taken into account by reason of the provision's matching rule, such tax is taken into account as a foreign income tax paid or accrued in the taxable year in which, and to the extent that, the taxpayer, the section 902 corporation, or a domestic corporation that meets the

⁶⁵ It is not intended that there be a foreign tax credit splitting event when, for example, a CFC pays or accrues a foreign income tax and takes into account the related income in the same year, even though the earnings and profits to which the foreign income tax relates may be distributed to a covered person as a dividend or included in such covered person's income under subpart F.

ownership requirements of section 902(a) or (b) with respect to the section 902 corporation (as the case may be) takes the related income into account under chapter 1 of the Code. Accordingly, for purposes of determining the carryback and carryover of excess foreign tax credits under section 904(c), the deduction for foreign taxes paid or accrued under section 164(a), and the extended period for claim of a credit or refund under section 6511(d)(3)(A), foreign income taxes to which the provision applies will first be taken into account, and treated as paid or accrued, in the year in which the related foreign income is taken into account. Notwithstanding the preceding rule, foreign taxes are translated into U.S. dollars in the year in which the taxes are paid or accrued under the general rules of section 986 rather than the year in which the related income is taken into account. The Secretary may issue regulations or other guidance providing additional exceptions.

The Secretary is also granted authority to issue regulations or other guidance as is necessary or appropriate to carry out the purposes of the provision. Such guidance may include providing successor rules addressing circumstances such as where, with respect to a foreign tax credit splitting event, the person who pays or accrues the foreign income tax or any covered person is liquidated. This grant of authority also allows the Secretary to provide appropriate exceptions from the application of the provision as well as to provide guidance as to how the provision applies in the case of any foreign tax credit splitting event involving a hybrid instrument. It is anticipated that the Secretary may also provide guidance as to the proper application of the provision in cases involving disregarded payments, group relief, or other arrangements having a similar effect.

An example of a foreign tax credit splitting event involving a hybrid instrument subject to the provision is as follows. U.S. Corp., a domestic corporation, wholly owns CFC1, a country A corporation. CFC1, in turn, wholly owns CFC2, a country A corporation. CFC2 is engaged in an active business that generates \$100 of income. CFC2 issues a hybrid instrument to CFC1. This instrument is treated as equity for U.S. tax purposes but as debt for foreign tax purposes. Under the terms of the hybrid instrument, CFC2 accrues (but does not pay currently) interest to CFC1 equal to \$100. As a result, CFC2 has no income for country A tax purposes, while CFC1 has \$100 of income, which is subject to country A tax at a 30 percent rate. For U.S. tax purposes, CFC2 still has \$100 of earnings and profits (the accrued interest is ignored since the United States views the hybrid instrument as equity), while CFC1 has paid \$30 of foreign taxes. Under the provision, the related income with respect to the \$30 of foreign taxes paid by CFC1 is the \$100 of earnings and profits of CFC2.

Effective Date

In general, the provision is effective with respect to foreign income taxes paid or accrued by U.S. taxpayers and section 902 corporations after December 31, 2010.

The provision also applies to foreign income taxes paid or accrued by a section 902 corporation on or before December 31, 2010 (and not deemed paid under section 902(a) or 960 on or before such date), but only for purposes of applying sections 902 and 960 with respect to periods after such date (the “deemed-paid transition rule”). Accordingly, such rule applies for purposes of applying section 902 and 960 to dividends paid, and inclusions under section 951(a) that occur, after December 31, 2010. However, no adjustment is made to a section 902

corporation's earnings and profits for the amount of any foreign income taxes suspended under the deemed-paid transition rule, either at the time of suspension or when such taxes are subsequently taken into account under the provision.

**B. Denial of Foreign Tax Credit with Respect to Foreign Income Not Subject
to United States Taxation by Reason of Covered Asset Acquisitions
(sec. 302 of the bill and new sec. 901(m) of the Code)**

Present Law

Foreign Tax Credit

The United States employs a worldwide tax system under which U.S. resident individuals and domestic corporations generally are taxed on all income, whether derived in the United States or abroad; the foreign tax credit provides relief from double taxation. Subject to the limitations discussed below, a U.S. taxpayer is allowed to claim a credit against its U.S. income tax liability for the foreign income taxes that it pays. A domestic corporation that owns at least 10 percent of the voting stock of a foreign corporation is allowed a “deemed-paid” credit for foreign income taxes paid by the foreign corporation that the domestic corporation is deemed to have paid when the related income is distributed or is included in the domestic corporation’s income under the provisions of subpart F.⁶⁶

The foreign tax credit is elective on a year-by-year basis. In lieu of electing the foreign tax credit, U.S. persons generally are permitted to deduct foreign taxes.⁶⁷

Deemed-paid foreign tax credit

U.S. corporations owning at least 10 percent of the voting stock of a foreign corporation are treated as if they had paid a share of the foreign income taxes paid by the foreign corporation in the year in which that corporation’s E&P become subject to U.S. tax as dividend income of the U.S. shareholder.⁶⁸ This credit is the “deemed-paid” or “indirect” foreign tax credit. A U.S. corporation may also be deemed to have paid foreign income taxes paid by a second-, third-, fourth-, fifth-, or sixth-tier foreign corporation, if certain requirements are satisfied.⁶⁹ Foreign income taxes paid below the third tier are eligible for the deemed-paid credit only with respect to foreign income taxes paid in taxable years during which the payor is a controlled foreign corporation (“CFC”). Foreign income taxes paid below the sixth tier are not eligible for the deemed-paid credit. In addition, a deemed-paid credit generally is available with respect to subpart F inclusions.⁷⁰ Moreover, a deemed-paid credit generally is available with respect to

⁶⁶ Secs. 901, 902, 960. Similar rules apply under sections 1291(g) and 1293(f) with respect to income that is includible under the passive foreign investment company (“PFIC”) rules.

⁶⁷ Sec. 164(a)(3).

⁶⁸ Sec. 902(a).

⁶⁹ Sec. 902(b).

⁷⁰ Sec. 960(a).

inclusions under the PFIC provisions by U.S. corporations meeting the requisite ownership threshold.⁷¹

The amount of foreign income tax eligible for the indirect credit is added to the actual dividend or inclusion (the dividend or inclusion is said to be “grossed-up”) and is included in the U.S. corporate shareholder’s income; accordingly, the shareholder is treated as if it had received its proportionate share of pre-tax profits of the foreign corporation and paid its proportionate share of the foreign income tax paid by the foreign corporation.⁷²

For purposes of computing the deemed-paid foreign tax credit, dividends (or other inclusions) are considered made first from the post-1986 pool of all the distributing foreign corporation’s accumulated E&P.⁷³ Accumulated E&P for this purpose include the E&P of the current year undiminished by the current distribution (or other inclusion).⁷⁴ Dividends in excess of the accumulated pool of post-1986 undistributed E&P are treated as paid out of pre-1987 accumulated profits and are subject to the ordering principles of pre-1986 Act law.⁷⁵

Foreign tax credit limitation

The foreign tax credit generally is limited to a taxpayer’s U.S. tax liability on its foreign-source taxable income (as determined under U.S. tax accounting principles).⁷⁶ This limit is intended to ensure that the credit serves its purpose of mitigating double taxation of foreign-source income without offsetting U.S. tax on U.S.-source income. The limit is computed by multiplying a taxpayer’s total U.S. tax liability for the year by the ratio of the taxpayer’s foreign-source taxable income for the year to the taxpayer’s total taxable income for the year. If the total amount of foreign income taxes paid and deemed paid for the year exceeds the taxpayer’s foreign tax credit limitation for the year, the taxpayer may carry the excess back to the previous taxable year or forward to one of the succeeding 10 taxable years.⁷⁷

The foreign tax credit limitation is generally applied separately to two different categories of income (referred to as “baskets”), passive basket income and general basket income.⁷⁸

⁷¹ Secs. 1291(g), 1293(f).

⁷² Sec. 78.

⁷³ Sec. 902(c)(6)(B). Earnings and profits computations for these purposes are to be made under U.S. concepts. Secs. 902(c)(1), 964(a).

⁷⁴ Sec. 902(c)(1).

⁷⁵ Sec. 902(c)(6).

⁷⁶ Secs. 901, 904.

⁷⁷ Sec. 904(c).

⁷⁸ Sec. 904(d). Separate foreign tax credit limitations also apply to certain categories of income described in other sections. See, e.g., secs. 901(j), 904(h)(10), 865(h).

Passive basket income generally includes investment income such as dividends, interest, rents, and royalties.⁷⁹ General basket income is all income that is not in the passive category. Because the foreign tax credit limitation must be applied separately to income in these two baskets, foreign tax imposed on income in one basket cannot be claimed as a credit against U.S. tax on income in the other basket.

Income that would otherwise constitute passive basket income is treated as general basket income if it is earned by a qualifying financial services entity (and certain other requirements are met).⁸⁰ Passive income is also treated as general basket income if it is high-taxed income (i.e., if the foreign tax rate is determined to exceed the highest rate of tax specified in section 1 or 11, as applicable).⁸¹ Dividends (and subpart F inclusions), interest, rents, and royalties received from a CFC by a U.S. person that owns at least 10 percent of the CFC are assigned to a separate limitation basket by reference to the basket of income out of which the dividend or other payment is made.⁸² Dividends received by a 10-percent corporate shareholder from a foreign corporation that is not a CFC are also categorized on a look-through basis.⁸³

Items Giving Rise to Permanent Basis Differences

In general, certain elections or transactions can result in the creation of additional asset basis eligible for cost recovery for U.S. tax purposes without a corresponding increase in the basis of such assets for foreign tax purposes. These include: (1) a qualifying stock purchase of a foreign corporation or domestic corporation with foreign assets for which a section 338 election is made; (2) an acquisition of an interest in a partnership holding foreign assets for which a section 754 election is in effect; and (3) certain other transactions involving an entity classification (“check-the-box”) election in which a foreign entity is treated as a corporation for foreign tax purposes and as a partnership or disregarded entity for U.S. tax purposes.⁸⁴

⁷⁹ Sec. 904(d)(2)(B). Passive income is defined by reference to the definition of foreign personal holding company income in section 954(c), and thus generally includes dividends, interest, rents, royalties, annuities, net gains from certain property or commodities transactions, foreign currency gains, income equivalent to interest, income from notional principal contracts, and income from certain personal service contracts. Exceptions apply for certain rents and royalties derived in an active business and for certain income earned by dealers in securities or other financial instruments. Passive category income also includes amounts that are includible in gross income under section 1293 (relating to PFICs) and dividends received from certain DISCs and FSCs.

⁸⁰ Sec. 904(d)(2)(C), (D).

⁸¹ Sec. 904(d)(2)(F).

⁸² Sec. 904(d)(3).

⁸³ Sec. 904(d)(4).

⁸⁴ Treas. Reg. sec. 301.7701-1, *et seq.*

Section 338 elections

In general, the basis of stock acquired by a U.S. taxpayer or a foreign subsidiary of a U.S. taxpayer is its cost,⁸⁵ and there is no adjustment to the basis of the assets held by the acquired corporation.⁸⁶ In certain circumstances, however, taxpayers may elect to treat a qualifying purchase of 80 percent of the stock of a target corporation (a “qualified stock purchase”) as a purchase of the underlying assets of the target corporation.⁸⁷ For this purpose, a “qualified stock purchase” is any transaction or series of transactions in which stock (meeting the requirements of section 1504(a)(2)) of one corporation is acquired by another corporation by purchase during the 12-month acquisition period.⁸⁸

Two alternatives exist for making a section 338 election when there is a qualifying stock purchase—one bilateral and one unilateral. A bilateral election, which is made pursuant to section 338(h)(10), requires a corporation to make a qualifying purchase of 80 percent of the stock of a domestic target corporation⁸⁹ that is a member of a selling consolidated group (or affiliated group if no election to file a consolidated return has been made), or a qualifying purchase of 80 percent of the stock of an S corporation by a corporation from S corporation shareholders. The election is made jointly by the buyer and seller of the stock and must be made by the 15th day of the ninth month beginning after the month in which the acquisition date occurs. Pursuant to this election, the assets (rather than the stock) of the target corporation are deemed to have been sold in a single transaction at the close of the acquisition date, and the target corporation is deemed to have liquidated. The asset sale is taken into account by the target prior to its acquisition by the purchasing corporation.⁹⁰

With a unilateral election, which is made pursuant to section 338(g), the purchasing corporation treats a qualified stock purchase of a corporation (including a foreign corporation) as a deemed asset acquisition, whether or not the seller of the stock is a corporation. Pursuant to this election, the seller or sellers recognize gain or loss on the stock sale, and the target corporation also recognizes gain or loss on the deemed asset sale. The deemed asset acquisition

⁸⁵ Secs. 1011, 1012.

⁸⁶ See sec. 1016.

⁸⁷ Sec. 338(a).

⁸⁸ Sec. 338(d)(3). Under section 1504(a)(2), the ownership of stock of any corporation meets the requirements of an affiliated group if it (A) possesses at least 80 percent of the total voting power of the stock of such corporation, and (B) has a value equal to at least 80 percent of the total value of the stock of such corporation. Further, section 1504(a)(4) states that for purposes of meeting the 80-percent requirement, the term stock does not include any stock which (A) is not entitled to vote, (B) is limited and preferred as to dividends and does not participate in corporate growth to any significant extent, (C) has redemption and liquidation rights which do not exceed the issue price of such stock, and (D) is not convertible into another class of stock.

⁸⁹ A foreign corporation cannot be the target corporation in the case of a section 338(h)(10) election. See Treas. Reg. sec. 1.338(h)(10)-1(b)(1), (2), (3).

⁹⁰ Sec. 338(h)(10); Treas. Regs. sec. 1.338(h)(10)-1(d)(3).

also eliminates the historic E&P of the target corporation. In general, in cases in which the target corporation is foreign and the seller is a U.S. person or a CFC, the deemed asset sale has U.S. tax consequences.⁹¹ However, when the seller is neither a U.S. person nor a CFC, generally no U.S. tax consequences result from the deemed asset sale.⁹² The election is made by the purchasing corporation and must be made by the 15th day of the ninth month beginning after the month in which the acquisition date occurs.

Pursuant to a section 338 election, the target corporation is treated as (1) having sold all of its assets at the close of the acquisition date at fair market value in a single transaction, and (2) a new corporation that purchased all of the assets as of the beginning of the day after the acquisition date.⁹³ Accordingly, the aggregate basis of the assets of the target equals the sum of (1) the grossed-up basis of the purchasing corporation's recently purchased stock, and (2) the basis of the purchasing corporation's nonrecently purchased stock, with appropriate adjustments for liabilities and other relevant items under the regulations.⁹⁴

Since a section 338 election is relevant solely for U.S. tax purposes, the adjustment to the basis of the assets of a foreign target corporation (or a foreign branch of a domestic corporation) that increases the amount of depreciation, amortization, depletion, or gain for purposes of calculating U.S. taxable income or E&P results in no corresponding adjustment for foreign income tax purposes. As a result, cost recovery deductions attributable to such additional basis generally result in a permanent difference between (1) the foreign taxable income upon which foreign income tax is levied, and (2) the U.S. taxable income (or E&P) upon which U.S. tax is levied (whether currently or upon repatriation) and with respect to which a foreign tax credit may be allowed for any foreign income taxes paid.

Section 754 election

A partnership does not generally adjust the basis of partnership property following the transfer of a partnership interest unless the partnership has made a one-time election under section 754 for such purposes.⁹⁵ If an election is in effect, adjustments to the basis of partnership

⁹¹ Section 338(h)(16) addresses the impact of the deemed asset sale on the E&P of the foreign target corporation for purposes of determining the source and character of any amount includible in gross income as a dividend under section 1248 to the seller.

⁹² When a domestic corporation or a CFC is the purchaser with respect to which a section 338(g) election is made for a foreign target corporation, the deemed asset sale may have U.S. tax consequences. For example, if the foreign target becomes a CFC for an uninterrupted period of 30 days or more during a taxable year pursuant to Section 951(a) prior to the purchasing corporation completing the qualified stock purchase, the deemed asset sale may generate subpart F income for any U.S. shareholder of the foreign target corporation. Treas. Reg. sec. 1.338-9(b).

⁹³ Sec. 338(a).

⁹⁴ Sec. 338(b).

⁹⁵ Sec. 743(a). But see section 743(d) requiring a reduction to the basis of partnership property in certain cases where there is a substantial built-in loss.

property are made with respect to the transferee partner to account for the difference between the transferee partner's proportionate share of the adjusted basis of the partnership property and the transferee's basis in its partnership interest.⁹⁶ These adjustments are intended to adjust the basis of partnership property to approximate the result of a direct purchase of the property by the transferee partner. Since a section 754 election has relevance only for U.S. tax purposes, to the extent that the underlying assets of the partnership include assets generating income subject to foreign tax, the basis adjustments made to these assets may also result in permanent differences between (1) the foreign taxable income upon which foreign income tax is levied, and (2) the U.S. taxable income (or E&P) upon which U.S. tax is levied (whether currently or upon repatriation) and with respect to which a foreign tax credit may be allowed for any foreign income taxes paid.

Check-the-box election

Comparable permanent differences between foreign taxable income and U.S. taxable income (or E&P) may also be achieved as a result of making a check-the-box election. Since a check-the-box election generally has no effect for foreign tax purposes, a sale of a wholly-owned foreign corporation for which an election to be disregarded is in effect will be respected as the sale of the corporation for foreign tax purposes but treated as the sale of branch assets for U.S. tax purposes. If the purchaser is a U.S. taxpayer or a foreign entity owned by a U.S. taxpayer, the U.S. taxpayer may have additional asset basis eligible for cost recovery for U.S. tax purposes without a corresponding increase in the tax basis of such assets for foreign tax purposes. In this case, there would be a permanent difference between (1) the foreign taxable income upon which foreign income tax is levied, and (2) the U.S. taxable income (or E&P) upon which U.S. tax is levied (whether currently or upon repatriation) and with respect to which a foreign tax credit may be allowed. Similar results may be achieved through other transactions in which a check-the-box election has been made.

Explanation of Provision

The provision denies a credit for the disqualified portion of any foreign income tax paid or accrued in connection with a covered asset acquisition.

A "covered asset acquisition" means: (1) a qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies;⁹⁷ (2) any transaction that is treated as the acquisition of assets for U.S. tax purposes and as the acquisition of stock (or is disregarded)⁹⁸ for purposes of the foreign income taxes of the relevant jurisdiction;⁹⁹ (3) any acquisition of an

⁹⁶ Sec. 743(b).

⁹⁷ This includes transaction under section 338(g) and section 338(h)(10).

⁹⁸ For example, the deemed liquidation of a CFC as the result of the making of an entity classification election pursuant to Treas. Reg. sec. 301.7701-3 may result in a section 331 liquidation for U.S. tax purposes that is disregarded for foreign income tax purposes.

⁹⁹ Section 336(e) provides that, to the extent provided by the Secretary, in cases in which (1) a corporation owns at least 80 percent of the vote and value of stock of another corporation (as defined in section 1504(a)(2)), and (2) such corporation sells, exchanges, or distributes all of stock of such corporation, an election may be made to treat

interest in a partnership that has an election in effect under section 754; and (4) to the extent provided by the Secretary, any other similar transaction. It is anticipated that the Secretary will issue regulations identifying other similar transactions that result in an increase to the basis of assets for U.S. tax purposes without a corresponding increase for foreign tax purposes.

The disqualified portion of any foreign income taxes paid or accrued with respect to any covered asset acquisition, for any taxable year, is the ratio (expressed as a percentage) of (1) the aggregate basis differences allocable to such taxable year with respect to all relevant foreign assets, divided by (2) the income on which the foreign income tax is determined. For this purpose, the income on which the foreign income tax is determined is the income as determined under the law of the relevant jurisdiction. If the taxpayer fails to substantiate such income to the satisfaction of the Secretary, then such income is determined by dividing the amount of such foreign income tax by the highest marginal tax rate applicable to such income in the relevant jurisdiction.

For purposes of determining the aggregate basis difference allocable to a taxable year, the term “basis difference” means, with respect to any relevant foreign asset, the excess of (1) the adjusted basis of such asset immediately after the covered asset acquisition, over (2) the adjusted basis of such asset immediately before the covered asset acquisition. Thus, it is the tax basis for U.S. tax purposes that is relevant, and not the basis as determined under the law of the relevant jurisdiction. Because CFCs are generally limited to straight-line cost recovery, it is anticipated that the basis difference applying U.S. tax principles will generally be less than if the taxpayer were required to use the basis as determined under foreign law immediately before the covered asset acquisition. However, it is anticipated that the Secretary will issue regulations identifying those circumstances in which, for purposes of determining the adjusted basis of such assets immediately before the covered asset acquisition, it may be acceptable to utilize the basis of such asset under the law of the relevant jurisdiction or another reasonable method.

A built-in loss in a relevant foreign asset (i.e., in cases in which the fair market value of the asset is less than its adjusted basis immediately before the asset acquisition) is taken into account in determining the aggregate basis difference; however, a built-in loss cannot reduce the aggregate basis difference allocable to a taxable year below zero.

In the case of a qualified stock purchase to which section 338(a) applies, the covered asset acquisition is treated as occurring at the close of the acquisition date (as defined in section 338(h)(2)).

In general, the amount of the basis difference allocable to a taxable year with respect to any relevant foreign asset is determined using the applicable cost recovery method under U.S. tax rules. If there is a disposition of any relevant foreign asset before its cost has been entirely

this sale, exchange, or distribution as a disposition of all of the assets of the other corporation, and no gain or loss is recognized on the sale, exchange, or distribution of the stock. To date, the Secretary has not promulgated regulations under section 336(e) so no election may be made. Nonetheless, to the extent regulations are promulgated under section 336(e) in the future permitting such an election to be made, a transaction to which the section 336(e) election relates would be a covered asset acquisition.

recovered or of any relevant foreign asset that is not eligible for cost recovery (e.g., land), the basis difference allocated to the taxable year of the disposition is the excess of the basis difference with respect to such asset over the aggregate basis difference with respect to such asset that has been allocated under this provision to all prior taxable years. Thus, any remaining basis difference is captured in the year of the sale, and there is no remaining basis difference to be allocated to any subsequent tax years. However, it is intended that this provision generally apply in circumstances in which there is a disposition of a relevant foreign asset where the associated income or gain is taken into account for purposes of determining foreign income tax in the relevant jurisdiction.

To illustrate, assume USP, a domestic corporation, acquires 100 percent of the stock of FT, a foreign target organized in Country F with a “u” functional currency, in a qualified stock purchase for which a section 338(g) election is made. The tax rate in Country F is 25 percent. Assume further that the aggregate basis difference in connection with the qualified stock purchase is 200u, including: (1) 150u that is attributable to Asset A, with a 15-year recovery period for U.S. tax purposes (10u of annual amortization); and (2) 50u that is attributable to Asset B, with a 5-year recovery period (10u of annual depreciation). In each of years 1 and 2, FT’s taxable income is 100u for local tax purposes and FT pays foreign income tax of 25u (equal to \$25 when translated at the average exchange rate for the year). As a result, the disqualified portion of foreign income tax in each of years 1 and 2 is \$5 ((10u + 10u of allocable basis difference / 100u of foreign taxable income) x \$25 foreign tax paid).

In year 3, FT’s taxable income is 140u, 40u of which is attributable to gain on the sale of Asset B. FT’s Country F tax is 35u (equal to \$35 translated at the average exchange rate for the year). Accordingly, the disqualified portion of its foreign income taxes paid is \$10 ((40u (including 10u of annual amortization on Asset A and 30u attributable to disposition of Asset B) of allocable basis difference / 140u of foreign taxable income) x \$35 foreign tax paid).

An asset is a “relevant foreign asset” with respect to any covered asset acquisition, whether the entity acquired is domestic or foreign, only if any income, deduction, gain, or loss attributable to such asset (including goodwill, going concern value, and any other intangible asset) is taken into account in determining foreign income tax in the relevant jurisdiction. For this purpose, the term “foreign income tax” means any income, war profits, or excess profits tax paid or accrued to any foreign country or to any possession of the United States, including any tax paid in lieu of such a tax within the meaning of section 903. In cases in which there has been a covered asset acquisition that involves either (1) both U.S. assets and relevant foreign assets, or (2) assets in multiple relevant jurisdictions, it is anticipated that the Secretary may issue regulations clarifying the manner in which any relevant foreign asset (such as intangible assets that may relate to more than one jurisdiction) will be allocated between those jurisdictions. It is also anticipated that the Secretary may issue regulations to clarify the extent to which income is considered attributable to a relevant foreign asset, as well as the treatment of an asset that ceases to be taken into account in determining the foreign income tax in the relevant jurisdiction by some mechanism other than a disposition.

To the extent that a foreign tax credit is disallowed, the disqualified portion is allowed as a deduction to the extent otherwise deductible.¹⁰⁰

The Secretary may issue regulations or other guidance as is necessary or appropriate to carry out the purposes of this provision, including to provide (1) an exemption for certain covered asset acquisitions, and (2) an exemption for relevant foreign assets with respect to which the basis difference is de minimis. For example, it is anticipated that the Secretary will exclude covered asset acquisitions that are not taxable for U.S. purposes, or in which the basis of the relevant foreign assets is also increased for purposes of the tax laws of the relevant jurisdiction.

Effective Date

In general, the provision is effective for covered asset acquisitions after December 31, 2010. However, the provision does not apply to any covered asset acquisition with respect to which the transferor and transferee are not related if such acquisition is (1) made pursuant to a written agreement that was binding on May 20, 2010, and at all times thereafter, (2) described in a ruling request¹⁰¹ submitted to the IRS on or before such date, or (3) described in a public announcement or filing with the SEC on or before such date.

For this purpose, a person shall be treated as related to another person if the relationship between such persons is described in sections 267 or 707(b).

¹⁰⁰ Sec. 164(a)(3).

¹⁰¹ A private letter ruling may be relied upon only by the taxpayer requesting the ruling. Transition relief is available only with respect to the transaction for which the ruling is requested.

**C. Separate Application of Foreign Tax Credit Limitation, Etc.,
to Items Resourced Under Treaties
(sec. 303 of the bill and sec. 904(d) of the Code)**

Present Law

The United States taxes its citizens and residents (including domestic corporations) on worldwide income. Because the countries in which income is earned also may assert their jurisdiction to tax the same income on the basis of source, foreign-source income earned by U.S. persons may be subject to double taxation. Subject to limitations discussed below, a U.S. taxpayer is allowed to claim a credit against its U.S. income tax liability for foreign income taxes paid or accrued.¹⁰² A domestic corporation that owns at least 10 percent of the voting stock of a foreign corporation is allowed a “deemed-paid” credit for foreign income taxes paid by the foreign corporation that the domestic corporation is deemed to have paid when the foreign corporation's earnings are distributed or included in the domestic corporation's income under the provisions of subpart F.¹⁰³

A foreign tax credit is available only for foreign income, war profits, and excess profits taxes, and for certain taxes imposed in lieu of such taxes.¹⁰⁴ Other foreign levies generally are treated as deductible expenses. The foreign tax credit is elective on a year-by-year basis. In lieu of electing the foreign tax credit, U.S. persons generally are permitted to deduct foreign taxes.¹⁰⁵

The foreign tax credit generally is limited to a taxpayer's U.S. tax liability on its foreign-source taxable income (as determined under U.S. tax accounting principles).¹⁰⁶ This limit is intended to ensure that the credit serves its purpose of mitigating double taxation of foreign-source income without offsetting U.S. tax on U.S.-source income. The limit is computed by multiplying a taxpayer's total U.S. tax liability for the year by the ratio of the taxpayer's foreign-source taxable income for the year to the taxpayer's total taxable income for the year. If the total amount of foreign income taxes paid and deemed paid for the year exceeds the taxpayer's foreign tax credit limitation for the year, the taxpayer may carry back the excess foreign taxes to the previous taxable year or carry forward the excess taxes to one of the succeeding 10 taxable years.¹⁰⁷

¹⁰² Sec. 901.

¹⁰³ Secs. 901, 902, 960. Similar rules apply under sections 1291(g) and 1293(f) with respect to income that is includible under the passive foreign investment company (“PFIC”) rules.

¹⁰⁴ Secs. 901(b), 903.

¹⁰⁵ Sec. 164(a)(3).

¹⁰⁶ Secs. 901, 904.

¹⁰⁷ Sec. 904(c).

The foreign tax credit limitation is generally applied separately for income in two different categories (referred to as “baskets”), passive category income and general category income.¹⁰⁸ Passive category income generally includes investment income such as dividends, interest, rents, and royalties.¹⁰⁹ General category income is all income that is not in the passive category. Because the foreign tax credit limitation must be applied separately to income in these two baskets, credits for foreign tax imposed on income in one basket cannot be used to offset U.S. tax on income in the other basket.

Income that would otherwise constitute passive basket income is treated as general basket income if it is earned by a qualifying financial services entity (and certain other requirements are met).¹¹⁰ Passive income is also treated as general basket income if it is high-taxed income (i.e., if the foreign tax rate is determined to exceed the highest rate of tax specified in section 1 or 11, as applicable).¹¹¹ Dividends (and subpart F inclusions), interest, rents, and royalties received from a CFC by a U.S. person that owns at least 10 percent of the CFC are assigned to a separate basket by reference to the basket of income out of which the dividend or other payment is made.¹¹² Dividends received by a 10-percent corporate shareholder from a foreign corporation that is not a CFC are also categorized on a look-through basis.¹¹³

In general, amounts derived from a foreign corporation (such as interest and dividends) are treated as foreign-source income for U.S. foreign tax credit limitation purposes. A special sourcing rule applies to amounts (such as interest and dividends) derived from a U.S.-owned foreign corporation that are attributable to U.S.-source income of the foreign corporation. This special sourcing rule treats such amounts, which would otherwise be treated as foreign source, as U.S. source.¹¹⁴ For these purposes, a U.S.-owned foreign corporation is a foreign corporation

¹⁰⁸ Sec. 904(d). Separate foreign tax credit limitations also apply to certain categories of income described in other sections. See, e.g., secs. 901(j), 904(h)(10), 865(h).

¹⁰⁹ Sec. 904(d)(2)(B). Passive income is defined by reference to the definition of foreign personal holding company income in section 954(c), and thus generally includes dividends, interest, rents, royalties, annuities, net gains from certain property or commodities transactions, foreign currency gains, income equivalent to interest, income from notional principal contracts, and income from certain personal service contracts. Exceptions apply for certain rents and royalties derived in an active business and for certain income earned by dealers in securities or other financial instruments. Passive category income also includes amounts that are includible in gross income under section 1293 (relating to PFICs) and dividends received from certain DISCs and FSCs.

¹¹⁰ Sec. 904(d)(2)(C), (D).

¹¹¹ Sec. 904(d)(2)(F).

¹¹² Sec. 904(d)(3).

¹¹³ Sec. 904(d)(4).

¹¹⁴ Sec. 904(h). The special sourcing rule applies in the case of subpart F and passive foreign investment company inclusions to the extent that such amount is attributable to income of the U.S.-owned foreign corporation from U.S. sources; in the case of dividends, to the portion of the U.S.-owned foreign corporation’s earnings and profits for the taxable year that are from U.S. sources; and in the case of interest paid to a U.S. shareholder or related person, to amounts properly allocable to the U.S.-owned foreign corporation’s U.S.-source income. De minimis exceptions apply if the U.S.-owned foreign corporation has a small amount of U.S.-source income.

that is at least 50-percent owned (directly or in certain cases indirectly) by vote or value by U.S. persons. The effect of sourcing what under the general rules would be foreign-source income as U.S.-source income under these special rules is to prevent taxpayers from routing U.S.-source income through a foreign affiliate to increase the taxpayer's foreign-source income and, therefore, the taxpayer's foreign tax credit limitation.

A coordination rule applies in the case of an amount that would be treated as U.S.-source income under the special sourcing rule but which is treated as foreign source under a treaty. If (1) any amount derived from a U.S.-owned foreign corporation would be treated as U.S.-source income under the special sourcing rule described above, (2) a U.S. treaty obligation would treat such income as arising from sources outside the United States, and (3) the taxpayer chooses the benefits of this coordination rule, then the amount will be treated as foreign source. However, for foreign tax credit limitation purposes, a separate limitation applies to such amount and the associated foreign taxes. This coordination rule applies only to amounts derived from a U.S.-owned foreign corporation, and not to amounts derived from a foreign branch or disregarded entity.

For gains from the sale of certain stock or intangibles, a similar special sourcing rule applies to treat any such gain as foreign source, while requiring the taxpayer to assign any such gain and associated taxes to a separate limitation category for purposes of computing the foreign tax credit.¹¹⁵ This rule applies to the gain from sale of stock in a foreign corporation or an intangible that would be U.S. source but which under a U.S.-treaty obligation is treated as foreign source with respect to which the taxpayer chooses the benefits of this rule. This rule also applies to certain gains derived from a liquidating distribution from certain U.S.-possession corporations.

Explanation of Provision

The provision applies a separate foreign tax credit limitation for each item that (1) would be treated as derived from sources within the United States, (2) would be treated as arising from sources outside the United States under a treaty obligation of the United States, and (3) the taxpayer chooses the benefits of such treaty.

The provision does not apply to items of income to which the coordination rule applicable to U.S.-owned foreign corporations or the rule for gains from the sale of certain stock or intangibles (discussed above) apply. The provision gives the Secretary authority to issue guidance as necessary or appropriate to carry out the purposes of the provision, including guidance providing that related items of income may be aggregated for purposes of the provision or grouping together items of income from the same trade or business.

Effective Date

The provision is effective for taxable years beginning after the date of enactment.

¹¹⁵ Sec. 865(h).

**D. Limitation on the Amount of Foreign Taxes Deemed Paid
with Respect to Section 956 Inclusions
(sec. 304 of the bill and sec. 960 of the Code)**

Present Law

The United States employs a worldwide tax system under which U.S. resident individuals and domestic corporations generally are taxed on all income, whether derived in the United States or abroad; the foreign tax credit provides relief from double taxation. Income earned directly or through a pass-through entity (such as a partnership) is taxed on a current basis. By contrast, active foreign business earnings that a U.S. person derives indirectly through a foreign corporation generally are not subject to U.S. tax until such earnings are repatriated to the United States through a distribution of those earnings to the U.S. person. This ability of U.S. persons to defer income is circumscribed by various regimes intended to restrict or eliminate tax deferral with respect to certain categories of passive or highly mobile income. The main anti-deferral regimes are the controlled foreign corporation (“CFC”) rules of subpart F¹¹⁶ and the passive foreign investment company rules.¹¹⁷

The subpart F CFC rules

Under the subpart F CFC rules, a 10 percent-or-greater U.S. shareholder (a “U.S. Shareholder”) of a CFC is subject to U.S. tax currently on (1) its pro rata share of certain income earned by the CFC¹¹⁸ and (2) certain untaxed earnings invested in U.S. property with respect to such shareholder.¹¹⁹ In each case, the U.S. Shareholder is subject to tax currently, whether or not such income is distributed. A CFC is defined generally as a foreign corporation with respect to which U.S. Shareholders own more than 50 percent of the combined voting power or total value of the stock of the corporation.¹²⁰

U.S. property held by CFCs

A U.S. Shareholder that owns stock in a CFC on the last day of the taxable year must include in its gross income the amount determined under section 956 with respect to such shareholder for such year (but only to the extent not previously taxed¹²¹) (a “section 956 inclusion”).¹²² The section 956 inclusion for any taxable year is generally the lesser of (1) the

¹¹⁶ See secs. 951-964.

¹¹⁷ See secs. 1291-1298.

¹¹⁸ Sec. 951(a)(1)(A).

¹¹⁹ Sec. 951(a)(1)(B).

¹²⁰ Sec. 957(a).

¹²¹ Sec. 959(a)(2).

¹²² Sec. 951(a)(1)(B).

excess of such shareholder's pro rata share of the average of the amounts of U.S. property held (directly or indirectly) by the CFC as of the close of each quarter of such taxable year over the amount of previously taxed income from prior section 956 inclusions¹²³ with respect to such shareholder, or (2) such shareholder's pro rata share of the applicable earnings of such CFC.¹²⁴

Foreign Tax Credits

Subject to the limitations discussed below, a U.S. person is allowed to claim a credit against its U.S. income tax liability for the foreign income taxes that it pays. As discussed below, a domestic corporation may¹²⁵ also be allowed a “deemed-paid” credit for foreign income taxes paid by a foreign corporation that the domestic corporation is deemed to have paid when the related income is distributed or is included in the domestic corporation’s income under the provisions of subpart F, including section 956 inclusions.¹²⁶

A foreign tax credit is available only for foreign income, war profits, and excess profits taxes, and for certain taxes imposed in lieu of such taxes. Other foreign levies generally are treated as deductible expenses. The foreign tax credit is elective on a year-by-year basis. In lieu of electing the foreign tax credit, U.S. persons generally are permitted to deduct foreign taxes.¹²⁷

Deemed-paid foreign tax credit

Domestic corporations owning at least 10 percent of the voting stock of a foreign corporation are treated as if they had paid a share of the foreign income taxes paid by the foreign corporation in the year in which that corporation’s earnings and profits (“E&P”) become subject to U.S. tax as dividend income of the domestic corporation.¹²⁸ This credit is the deemed-paid, or indirect, foreign tax credit. A domestic corporation may also be deemed to have paid taxes paid by a second-, third-, fourth-, fifth-, or sixth-tier foreign corporation, if certain requirements are satisfied.¹²⁹ Foreign taxes paid below the third tier are eligible for the deemed-paid credit only with respect to taxes paid in taxable years during which the payor is a CFC and the corporation claiming the credit is a U.S. Shareholder of the CFC.¹³⁰ Foreign taxes paid below the sixth tier

¹²³ See sec. 959(c)(1)(A).

¹²⁴ Sec. 956(a).

¹²⁵ A U.S. Shareholder includes individuals and entities. Sec. 951(b). In contrast, only those U.S. Shareholders that are corporations are entitled to the deemed-paid credit.

¹²⁶ Secs. 901, 902, 960. Similar rules apply under sections 1291(g) and 1293(f) with respect to income that is includible under the passive foreign investment company (“PFIC”) rules.

¹²⁷ Sec. 164(a)(3).

¹²⁸ Sec. 902(a).

¹²⁹ Sec. 902(b).

¹³⁰ Sec. 902(b)(2).

are not eligible for the deemed-paid credit. In addition, a deemed-paid credit generally is available with respect to any inclusion of subpart F income or investments of earnings in U.S. property for the taxable year.¹³¹ The amount of the credit is determined by the same formula as under section 902, except that the numerator of the ratio is the amount of the inclusion, rather than the amount of dividends received during the taxable year.¹³²

E&P is determined under the same rules for purposes of the deemed-paid credit fraction with respect to subpart F and section 956 inclusions as for dividends.¹³³ These rules generally¹³⁴ provide that the E&P of any foreign corporation is determined according to rules substantially similar to those applicable to domestic corporations, under regulations prescribed by the Secretary. The amount of foreign tax eligible for the indirect credit is added to the actual dividend or inclusion (the dividend or inclusion is said to be “grossed-up”) and is included in the domestic corporation’s income; accordingly, the domestic corporation is treated as if it had received its proportionate share of pre-tax profits of the foreign corporation and paid its proportionate share of the foreign tax paid by the foreign corporation.¹³⁵

For purposes of computing the deemed-paid foreign tax credit, distributions (or other inclusions) are considered made first from the post-1986 pool of all the distributing foreign corporation’s accumulated E&P.¹³⁶ Accumulated E&P for this purpose includes the E&P of the current year undiminished by the current distribution (or other inclusion).¹³⁷ Distributions in excess of the accumulated pool of post-1986 undistributed E&P are treated as paid out of pre-1987 accumulated profits and are subject to the ordering principles of pre-1986 Act law.¹³⁸

Foreign tax credit limitation

The foreign tax credit generally is limited to a taxpayer’s U.S. tax liability on its foreign-source taxable income (as determined under U.S. tax accounting principles).¹³⁹ This limit is intended to ensure that the credit serves its purpose of mitigating double taxation of foreign-source income without offsetting U.S. tax on U.S.-source income. The limit is computed by

¹³¹ Sec. 960(a).

¹³² Sec. 960(a)(1); Treas. Reg. sec. 1.960-1(i)(1).

¹³³ See secs. 902(c)(1), 964; Treas. Reg. sec. 1.964-1(a)(1).

¹³⁴ For an exception, see sec. 312(k)(4).

¹³⁵ Sec. 78.

¹³⁶ Sec. 902(c)(6)(B). E&P computations for these purposes are to be made under U.S. tax principles. Secs. 902(c)(1), 964(a).

¹³⁷ Sec. 902(c)(1).

¹³⁸ Sec. 902(c)(6).

¹³⁹ Secs. 901, 904.

multiplying a taxpayer's total U.S. tax liability for the year by the ratio of the taxpayer's foreign-source taxable income for the year to the taxpayer's total taxable income for the year. If the total amount of foreign income taxes paid and deemed paid for the year exceeds the taxpayer's foreign tax credit limitation for the year, the taxpayer may carry back the excess foreign taxes to the previous taxable year or carry forward the excess taxes to one of the succeeding 10 taxable years.¹⁴⁰

The foreign tax credit limitation is generally applied separately to two different categories of income, passive category income and general category income.¹⁴¹ Passive category income generally includes investment income such as dividends, interest, rents, and royalties.¹⁴² General category income is generally all income that is not in the passive category. Because the foreign tax credit limitation must be applied separately to income in these two categories, credits for foreign tax imposed on income in one category cannot be used to offset U.S. tax on income in the other category.

Income that would otherwise constitute passive category income is treated as general category income if it is earned by a qualifying financial services entity (and certain other requirements are met).¹⁴³ Passive income is also treated as general category income if it is high-taxed income (i.e., if the foreign tax rate is determined to exceed the highest rate of tax specified in section 1 or 11, as applicable).¹⁴⁴ Dividends (and subpart F inclusions), interest, rents, and royalties received from a CFC by a U.S. person are assigned to a separate limitation category by reference to the category of income out of which the dividend or other payment is made.¹⁴⁵ Dividends received by a U.S. person from a foreign corporation that is not a CFC are also categorized on a look-through basis.¹⁴⁶ For purposes of determining the foreign tax credit limitation, section 956 inclusions are treated as dividends.¹⁴⁷

¹⁴⁰ Sec. 904(c).

¹⁴¹ Sec. 904(d). Separate foreign tax credit limitations also apply to certain categories of income described in other sections. See, e.g., secs. 901(j), 904(h)(10), 865(h).

¹⁴² Sec. 904(d)(2)(B). Passive income is defined by reference to the definition of foreign personal holding company income in section 954(c), and thus generally includes dividends, interest, rents, royalties, annuities, net gains from certain property or commodities transactions, foreign currency gains, income equivalent to interest, income from notional principal contracts, and income from certain personal service contracts. Exceptions apply for certain rents and royalties derived in an active business and for certain income earned by dealers in securities or other financial instruments. Passive category income also includes amounts that are includible in gross income under section 1293 (relating to PFICs) and dividends received from certain DISCs and FSCs.

¹⁴³ Sec. 904(d)(2)(C), (D).

¹⁴⁴ Sec. 904(d)(2)(F).

¹⁴⁵ Sec. 904(d)(3).

¹⁴⁶ Sec. 904(d)(4).

¹⁴⁷ Sec. 904(d)(3)(G).

Under the foreign tax credit limitation rules, the total amount of the credit taken into account cannot exceed the same proportion of the tax against which such credit is taken which the taxpayer's taxable income from sources without the United States (but not in excess of the taxpayer's taxable income) bears to his entire taxable income for the same taxable year.

Explanation of Provision

The provision imposes a limit on the amount of foreign taxes that a U.S. Shareholder is deemed to pay under the foreign tax credit rules with respect to any section 956 inclusion.

For section 956 inclusions attributable to U.S. property acquired by a CFC after the effective date, the amount of foreign taxes deemed paid in each separate category is determined by comparing the foreign taxes deemed paid with respect to the U.S. Shareholder's section 956 inclusion (determined without regard to the provision) (the “tentative credit”) to its hypothetical amount of foreign taxes deemed paid as computed under the provision (the “hypothetical credit”). The U.S. Shareholder's hypothetical credit is the amount of foreign taxes it would have been deemed to have paid if cash in an amount equal to the section 956 inclusion had been distributed through the chain of ownership that begins with the foreign corporation that holds the investment in U.S. property and ends with the U.S. Shareholder. If the hypothetical credit is less than the tentative credit, then the amount of foreign taxes deemed paid with respect to the section 956 inclusion is limited to the hypothetical credit. However, the amount of the tentative credit is not increased if the hypothetical credit would have been greater than the tentative credit. This limitation applies whether the U.S. Shareholder chooses to claim a credit¹⁴⁸ for foreign taxes paid or accrued, or to deduct such taxes.¹⁴⁹

In general, no special rules apply in determining the hypothetical credit. The only exception is that, to the extent an actual distribution would be subject to any income or withholding tax, such taxes are not taken into account in determining the hypothetical credit.¹⁵⁰ Thus, the generally applicable rules and definitions¹⁵¹ apply to each hypothetical distribution. For example, assume that, for the relevant tax year, and before taking into account the hypothetical distribution under the provision, a U.S. parent (“USP”) owns all of the vote and value of CFC1, a CFC organized in Country A with post-1986 undistributed earnings of 200u, and post-1986 foreign income taxes in the amount of \$10.¹⁵² CFC1 owns all of the vote and

¹⁴⁸ Sec. 901.

¹⁴⁹ Sec. 164(a)(3).

¹⁵⁰ Similarly, if this hypothetical distribution would be subject to a withholding tax upon distribution to USP, if it had been actually made, any such tax would not be taken into account in determining the hypothetical credit. However, this conclusion results because such taxes are described in section 901(b), thus they are outside the scope of the provision.

¹⁵¹ See, e.g., secs. 902(b), (c), and 904(d)(3)(B), (D).

¹⁵² For purposes of this example, assume that each CFC has: (1) a “u” functional currency; (2) E&P comprising solely post-1986 undistributed earnings or deficits in post-1986 undistributed earnings, such that there are no pre-1987 accumulated profits; (3) only post-1986 foreign income taxes; (4) no previously-taxed income; (5)

value of CFC2, a CFC organized in Country B with post-1986 undistributed earnings of 100u, and post-1986 foreign income taxes in the amount of \$50. If CFC2 makes a loan to USP that results in a section 956 inclusion in the amount of 100u, the tentative credit is \$50 (equal to $100u/100u \times \$50$).

The hypothetical distribution of 100u from CFC2 to CFC1 would increase CFC1's current E&P by 100u, from 200u to 300u, and increase CFC1's foreign income taxes from \$10 to \$60. The 100u hypothetical distribution results in a dividend of 100u that is non-subpart F income of CFC1 under the subpart F look-through rules.¹⁵³ Although Country B would impose a 10 percent withholding tax on an actual distribution of 100u to CFC1, for a total withholding tax of 10u, this amount is not taken into account in determining the hypothetical credit. Next, the 100u hypothetical distribution from CFC1 to USP would result in a dividend of 100u, on which USP would be deemed to have paid \$20 in taxes.¹⁵⁴ Because the hypothetical credit of \$20 is less than the tentative credit of \$50, USP's foreign taxes deemed paid with respect to its section 956 inclusion are limited to \$20. USP's section 78 gross-up with respect to the section 956 inclusion is also \$20.¹⁵⁵

The provision is applied with regard to earnings and taxes in each separate category. In addition, treatment of any foreign taxes over the limit imposed under the provision (the "excess taxes") is the same as the treatment of any other foreign taxes paid or accrued, but not yet deemed paid for purposes of the foreign tax credit rules. Thus, if a foreign corporation's excess taxes are in its general category post-1986 foreign income taxes pool, the foreign corporation's excess taxes are still considered general category post-1986 foreign income taxes.¹⁵⁶ Accordingly, such taxes are included in the computation of foreign taxes deemed paid with respect to a subsequent distribution from, or income inclusion with respect to, that foreign

only E&P and foreign income taxes in the section 904(d) general category; and (6) no other attributes than those listed. Except as provided in the example, there are no other distributions or inclusions during the taxable year. In addition, Country B imposes a 10-percent withholding tax on dividend payments to foreign shareholders.

¹⁵³ Sec. 954(c)(6). This assumes that the subpart F look-through rules of section 954(c)(6) are extended, and are therefore applicable to the hypothetical distribution. In the event the look-through rule of section 954(c)(6) expires, the 100u hypothetical distribution would result in a dividend of 100u that would be currently included in USP's income as a subpart F item at the level of CFC1.

¹⁵⁴ The hypothetical amount of foreign taxes deemed paid equals $(100u/300u) \times \$60$. The post-1986 undistributed earnings that is the denominator of the section 902(a) fraction for purposes of the provision equals CFC1's post-1986 undistributed earnings of 200u (determined without regard to the provision) plus the amount of the hypothetical dividend from CFC2, 100u.

¹⁵⁵ If, in the same taxable year, CFC1 were also to make an actual distribution of all its accumulated E&P of 200u, the 100u hypothetical distribution from CFC1 to USP would have no impact on the calculation of USP's actual deemed paid credit from CFC1's actual dividend. The deemed-paid credit on the 200u dividend would be \$10, which equals $(200u/200u) \times \$10$. In addition, the calculation of the hypothetical credit with respect to the hypothetical distribution of 100u from CF2 would be the same $(100u/300u \times \$60 = \$20)$ whether or not CFC1 paid an actual dividend.

¹⁵⁶ Sec. 902(c)(2).

corporation, subject to applicable limitations including the limitation of the provision. In the example above, excess taxes that remain at CFC2 equal \$30.¹⁵⁷

The provision applies to U.S. property acquired by a CFC after May [], 2010. Thus, for example, any section 956 inclusions from a CFC loan that was made to its U.S. parent on or before May [], 2010 would not be subject to the limitation imposed by the provision. However, the limitation imposed by the provision would apply if, after May [], 2010, there is a significant modification of the debt instrument such that the original debt instrument is considered as exchanged for a modified instrument that differs materially from the original.¹⁵⁸

The provision requires the Secretary to issue regulations to carry out its purposes, including regulations that prohibit inappropriate use of excess taxes. It is anticipated that such regulations would address transactions engaged in with a principal purpose to avoid the application of this provision, including through a series of transactions engaged in pursuant to a plan with such a principal purpose.

Effective Date

The provision is effective for acquisitions of United States property made by CFC's after December 31, 2010.

¹⁵⁷ The excess taxes equal the deemed paid foreign tax credit (determined without regard to the provision) of \$50 minus the hypothetical credit of \$20. Alternatively, if CFC2's E&P also included 125u in previously taxed income, then the excess taxes remaining at CFC2 would be \$50, because the applicable ordering rules would prioritize the hypothetical distribution as coming first from the 125u in previously taxed income over the 100u in untaxed earnings. See sec. 959(c).

¹⁵⁸ See Treas. Reg. sec. 1.1001-3.

**E. Special Rule with Respect to Certain Redemptions by Foreign Subsidiaries
(sec. 305 of the bill and sec. 304(b) of the Code)**

Present Law

Under section 304, if one corporation (the “acquiring corporation”) purchases stock of a related corporation (the “target corporation”) in exchange for property, the transaction generally is recharacterized as a redemption. To the extent a section 304(a)(1) transaction is treated as a distribution under section 301, the transferor and the acquiring corporation are treated as if (1) the transferor had transferred the stock of the target corporation to the acquiring corporation in exchange for stock of the acquiring corporation in a transaction to which section 351(a) applies, and (2) the acquiring corporation had then transferred the property to the transferor in redemption of the stock it is deemed as having issued.¹⁵⁹ In the case of a section 304 transaction, the amount and the source of a dividend are determined as if the property were distributed by the acquiring corporation to the extent of its earnings and profits (“E&P”), and then by the target corporation to the extent of its E&P.¹⁶⁰ To the extent the dividend is sourced from the E&P of the acquiring corporation, the transferor is considered to receive the dividend directly from the acquiring corporation;¹⁶¹ this is commonly referred to as “hopscotching” because the dividend bypasses any intermediary shareholders.

Special rules apply if the acquiring corporation is foreign.¹⁶² For purposes of determining the amount of the dividend to the transferor, the foreign acquiring corporation's E&P that is taken into account is limited to the portion of such E&P that (1) is attributable to stock of the foreign acquiring corporation held by a corporation or individual who is the transferor (or a person related thereto) of the target corporation and who is a U.S. shareholder¹⁶³ of the foreign acquiring corporation and (2) was accumulated while such stock was owned by the transferor (or a person related thereto) and while the foreign acquiring corporation was a controlled foreign corporation (“CFC”).¹⁶⁴

Section 1442 generally requires a 30-percent gross basis tax to be withheld on dividend payments to foreign persons unless reduced or eliminated pursuant to an applicable income tax treaty.

¹⁵⁹ Sec. 304(a)(1).

¹⁶⁰ Sec. 304(b)(2).

¹⁶¹ See H.R. Rep. No. 98-861 (1984) (Conf. Rep.), 1222-1224; Rev. Rul. 80-189, 1980-2 C.B. 106.

¹⁶² Sec. 304(b)(5).

¹⁶³ As that term is defined by section 951(b).

¹⁶⁴ See sec. 304(b)(5).

Explanation of Provision

The provision generally imposes an additional limitation on the E&P of a foreign acquiring corporation that is taken into account in determining the amount (and source) of the distribution that is treated as a dividend.

Under the provision, if more than 50 percent of the dividends arising from acquisition (before taking into account the provision) would not be (1) subject to U.S. tax in the year in which the dividend arises or (2) includible in the E&P of a CFC,¹⁶⁵ then the E&P of the foreign acquiring corporation is not taken into account.¹⁶⁶

If it is determined that the special rule applies, none of the foreign acquiring corporation's E&P is taken into account. In such case, the only E&P that is taken into account to determine the amount constituting a dividend is the target corporation's E&P. Where applicable, the special rule effectively prevents the foreign acquiring corporation's E&P from permanently escaping U.S. taxation by being deemed to be distributed directly to a foreign person (i.e., the transferor) without an intermediate distribution to a domestic corporation in the chain of ownership between the acquiring corporation and the transferor corporation. Generally, if the transferor is a foreign corporation (and not a CFC) and the acquiring corporation is a CFC, it is not relevant whether the target corporation is a domestic or a foreign corporation. However, if the target is a U.S. corporation, the 30-percent gross basis withholding tax applies to the amount constituting a dividend from the target, unless reduced or eliminated by treaty.¹⁶⁷

It is anticipated that regulations will provide a rule to prevent the avoidance of the provision, including through the use of partnerships, options, or other arrangements to cause a foreign corporation to be treated as a CFC.

Effective Date

The provision is effective for acquisitions after December 31, 2010.

¹⁶⁵ For purposes of this rule, "CFC" is defined by reference to section 957, but without regard to section 953(c).

¹⁶⁶ It is not intended that the provision apply if an amount is not subject to tax under this chapter for the taxable year in which the dividend arises solely as a result of the application of section 959.

¹⁶⁷ Sec. 1442; Rev. Rul. 92-85; 1992-2 C.B. 69.

**F. Modification of Affiliation Rules for Purposes of Rules Allocating Interest Expense
(sec. 306 of the bill and sec. 864 of the Code)**

Present Law

In general

The United States employs a worldwide tax system under which U.S. resident individuals and domestic corporations generally are taxed on all income, whether derived in the United States or abroad; the foreign tax credit provides relief from double taxation. The foreign tax credit generally is limited to the U.S. tax liability on a taxpayer's foreign-source income, in order to ensure that the credit serves its purpose of mitigating double taxation of foreign-source income without offsetting the U.S. tax on U.S.-source income.¹⁶⁸

To compute the foreign tax credit limitation, a taxpayer must determine the amount of its taxable income from foreign sources by allocating and apportioning deductions between items of U.S.-source gross income, on the one hand, and items of foreign-source gross income, on the other. There are no specific rules for most types of deductions.¹⁶⁹ Specific provisions govern the allocation and apportionment of interest.¹⁷⁰

For interest allocation purposes, all members of an affiliated group of corporations generally are treated as a single corporation (the so-called "one-taxpayer rule") and allocation must be made on the basis of assets rather than gross income.¹⁷¹

Foreign corporations owned by an affiliated group of corporations

The term "affiliated group" in this context generally is defined by reference to the rules for determining whether corporations are eligible to file consolidated returns.¹⁷² These rules exclude all foreign corporations from an affiliated group.¹⁷³ Thus, while debt generally is

¹⁶⁸ Secs. 901, 904.

¹⁶⁹ See, e.g., secs. 861(b), 862(b), and 863(a), which require that a taxpayer properly allocate and apportion expenses, losses, or other deductions, without containing any specific rules for allocating and apportioning particular types of deductions.

¹⁷⁰ Sec. 864(e). In the case of interest expense, the rules generally are based on the premise that money is fungible and that interest expense is properly attributable to all business activities and property of a taxpayer, regardless of any specific purpose for incurring an obligation on which interest is paid. Temp. Reg. sec. 1.861-9T(a).

¹⁷¹ Secs. 864(e)(1), 864(e)(2).

¹⁷² Secs. 864(e)(5)(A), sec. 1504. The affiliated group for interest allocation purposes generally excludes certain corporations that are financial institutions. These corporate financial institutions are not treated as members of the regular affiliated group for purposes of applying the one-taxpayer rule to other non-financial members of that group. Instead, all such corporate financial institutions that would be so affiliated are treated as a separate single corporation for interest allocation purposes. Sec. 864(e)(5)(B).

¹⁷³ Sec. 1504(b)(3).

considered fungible among the assets of a group of domestic affiliated corporations, the same rules do not apply as between the domestic and foreign members of a group with the same degree of common control as the domestic affiliated group.

Under Treasury regulations, however, certain foreign corporations are treated as affiliated corporations, in certain respects, if (1) at least 80 percent of either the vote or value of the corporation's outstanding stock is owned directly or indirectly by members of an affiliated group, and (2) more than 50 percent of the corporation's gross income for the taxable year is effectively connected with the conduct of a U.S. trade or business (also known as effectively connected income).¹⁷⁴

In the case of a foreign corporation that is treated as an affiliated corporation for interest allocation and apportionment purposes, the percentage of its assets and income that is taken into account varies depending on the percentage of the corporation's gross income that is effectively connected income. If 80 percent or more of the foreign corporation's gross income is effectively connected income, then all the corporation's assets and interest expense are taken into account. If, instead, between 50 percent and 80 percent of the foreign corporation's gross income is effectively connected income, then only the corporation's assets that generate effectively connected income and a percentage of its interest expense equal to the percentage of its assets that generate effectively connected income are taken into account.¹⁷⁵

Explanation of Provision

The provision treats a foreign corporation as a member of an affiliated group, for interest allocation and apportionment purposes, if (1) more than 50 percent of the gross income of such foreign corporation for the taxable year is effectively connected income, and (2) at least 80 percent of either the vote or value of all outstanding stock of such foreign corporation is owned directly or indirectly by members of the affiliated group (determined with regard to this sentence). Thus, under the provision, if more than 50 percent of a foreign corporation's gross income is effectively connected income and at least 80 percent of either the vote or value of all outstanding stock of such foreign corporation is owned directly or indirectly by members of the affiliated group, then all of the foreign corporation's assets and interest expense are taken into account for the purposes of allocating and apportioning the interest expense of the affiliated group.

¹⁷⁴ Temp. Reg. sec. 1.861-11T(d)(6)(ii). The question as to whether a foreign person is engaged in a U.S. trade or business has generated a significant body of case law. Basic issues involved in the determination include whether the activity constitutes business rather than investing, whether sufficient activities in connection with the business are conducted in the United States, and whether the relationship between the foreign person and persons performing functions in the United States with respect to the business is sufficient to attribute those functions to the foreign person. Generally, only U.S.-source income is treated as effectively connected with the conduct of a U.S. trade or business. However, certain limited categories of foreign-source income are treated as effectively connected if the income is attributable to an office or other fixed place of business maintained by the foreign person in the United States. Sec. 864(c).

¹⁷⁵ Temp. Reg. sec. 1.861-11T(d)(6)(ii).

Effective Date

The provision applies to taxable years beginning after the date of enactment.

G. Termination of Special Rules for Interest and Dividends Received from Persons Meeting the 80-Percent Foreign Business Requirements (sec. 307 of the bill and secs. 861(a)(1)(A) and 871(i) of the Code)

Present Law

The source of interest and dividend income generally is determined by reference to the country of residence of the payor.¹⁷⁶ Thus, an interest or dividend payment from a U.S. payor to a foreign person generally is treated as U.S.-source income and is subject to the 30-percent gross-basis U.S. withholding tax.¹⁷⁷ However, if a resident alien individual or domestic corporation satisfies an 80-percent active foreign business income requirement (the “80/20 test”), all or a portion of any interest paid by the resident alien individual or the domestic corporation (a so-called “80/20 company”) is exempt from U.S. withholding tax. Interest paid by a resident alien individual that satisfies the 80/20 test or by an 80/20 company is treated as foreign-source income and is therefore exempt from the 30-percent withholding tax if it is paid to unrelated parties.¹⁷⁸ When a resident alien individual or 80/20 company pays interest to a related party, the resourcing rule applies only to the percentage of the interest that is equal to the percentage of the resident alien individual’s or 80/20 company’s foreign-source income (described below) as a portion of the resident alien individual’s or 80/20 company’s total gross income during the three-year testing period (a so-called “look-through” approach).¹⁷⁹

In addition to interest, all or part of a dividend paid by an 80/20 company may also be exempt from U.S. withholding tax. The percentage of the dividend paid by an 80/20 company that equals the percentage of the 80/20 company’s total gross income during the testing period that is foreign source is exempt from U.S. withholding tax.¹⁸⁰ Unlike interest, a dividend paid by an 80/20 company remains U.S. source (for example, for foreign tax credit limitation purposes).

In general, a resident alien individual or domestic corporation meets the 80/20 test if at least 80 percent of the gross income of the resident alien individual or corporation during the testing period is derived from foreign sources and is attributable to the active conduct of a trade or business in a foreign country (or a U.S. possession) by the resident alien individual or corporation or, in the case of a corporation, a 50-percent owned subsidiary of that corporation. The testing period generally is the three-year period preceding the year in which the interest or dividend is paid.¹⁸¹

¹⁷⁶ Secs. 861(a)(1), (2), 862(a)(1), (2).

¹⁷⁷ Secs. 871(a)(1)(A), 881(a)(1), 1441(b), 1442(a).

¹⁷⁸ Sec. 861(a)(1)(A).

¹⁷⁹ Sec. 861(c)(2).

¹⁸⁰ Sec. 871(i).

¹⁸¹ Sec. 861(c)(1). The income of a subsidiary is attributed to the tested company only to the extent that the tested company actually receives income from the subsidiary in the form of dividends. *Conference Report to the*

Explanation of Provision

The provision repeals the present law rule that treats as foreign source all or a portion of any interest paid by a resident alien individual or domestic corporation that meets the 80/20 test. The provision also repeals the present law rule that exempts from U.S. withholding tax all or a portion of any dividends paid by a domestic corporation that meets the 80/20 test.

The provision provides a grandfather rule for any domestic corporation that (1) meets the 80/20 test (as in effect before the enactment of this provision) (hereinafter “the present law 80/20 test”) for its last taxable year beginning before January 1, 2011 (“an existing 80/20 company”), (2) meets a “new 80/20 test” with respect to each taxable year beginning after December 31, 2010, and (3) has not added a substantial line of business with respect to such corporation after the date of enactment of this provision. Any payment of dividend or interest after December 31, 2010 by an existing 80/20 company that meets the grandfather rule will be exempt from withholding tax to the extent of the existing 80/20 company’s active foreign business percentage. Nonetheless, any payment of interest will be treated as U.S.-source income.

As with the present law 80/20 test, a corporation meets the 80-percent foreign business requirements of the new 80/20 test if it is shown to the satisfaction of the Secretary that at least 80-percent of the gross income from all sources of such corporation for the testing period is active foreign business income. This percentage—active foreign business income of the company for the testing period as a percentage of total gross income of the company for the testing period—is also the company’s active foreign business percentage for purposes of determining the portion of any dividend or interest paid by an existing 80/20 company that is exempt from withholding tax. However, except as modified by the transition rule below, the existing 80/20 company and all of its subsidiaries are aggregated and treated as one corporation. For this purpose, a subsidiary means any corporation in which the existing 80/20 company owns (directly or indirectly) stock meeting the requirements of section 1504(a)(2), determined by substituting 50 percent for 80 percent and without regard to section 1504(b)(3). As a result, an existing 80/20 company must take into account the gross income of any domestic or foreign subsidiary. The Secretary may issue guidance as is necessary or appropriate to carry out the purpose of this provision, including guidance providing for the proper application of the aggregation rules.

Under the new 80/20 test, the testing period is the three-year period ending with the close of the taxable year of the corporation preceding the payment (or such part of such period as may be applicable). If the corporation has no gross income for such three-year period (or part thereof), the testing period is the taxable year in which the payment is made.

The grandfather rule includes a transition rule that applies in the case of any taxable year for which the testing period includes one or more taxable years beginning before January 1, 2011. Under this transition rule, a corporation meets the 80-percent foreign business requirements if, and only if, the weighted average of (1) the percentage of the corporation’s gross

1986 Tax Reform Act, Pub. L. No. 99-514, Vol II, 602; see also Rev. Rul. 73-63, 1973-1 C.B. 336; P.L.R. 6905161160A (May 16, 1969).

income from all sources that is active foreign business income (as defined in subparagraph (B) of section 861(c)(1) (as in effect before the date of enactment of this provision)) for the portion of the testing period that includes taxable years beginning before January 1, 2011,¹⁸² and (2) the percentage of the corporation's gross income from all sources that is active foreign business income for the portion of the testing period, if any, that includes taxable years beginning on or after January 1, 2011, is at least 80 percent. Accordingly, this transition rule applies instead of the new 80/20 test for the relevant tax years. This weighted average percentage is also treated as the active foreign business percentage for purposes of determining the amount of withholding for such taxable years.

The following example illustrates the operation of this transition rule. Assume a domestic corporation has \$100 of active foreign business income and no other income on a separate company basis (i.e., without regard to the income of any affiliate) for each of the 2008, 2009, and 2010 tax years. For the 2011, 2012, and 2013 tax years, the domestic company has \$700 of active foreign business income and \$300 of other income on an aggregate basis (including the income of its 50-percent owned domestic and foreign subsidiaries). Under the provision, the domestic company's weighted average percentage for the 2011 tax year is 100 percent, determined by considering the 2008, 2009, and 2010 tax years on a separate company basis ($(\$100 + \$100 + \$100)/(\$100 + \$100 + \$100)$). Therefore, for the 2011 tax year, the domestic company meets the 80-percent active foreign business requirements, and its active foreign business percentage is 100 percent for the 2011 tax year.

For the 2012 tax year, the weighted average percentage is 90 percent, determined by considering the 2009 and 2010 tax years on a separate company basis ($(\$100 + \$100)/(\$100 + \$100) \times 2/3$) or 66.7 percent) and the 2011 tax year on an aggregate basis ($(\$700/\$1,000) \times 1/3$ or 23.3 percent). As a result, the domestic company meets the 80-percent active foreign business requirements, and its active foreign business percentage is 90 percent for the 2012 tax year.

For the 2013 tax year, the weighted average percentage is 80 percent, determined by considering the 2010 tax year on a separate company basis ($(\$100/\$100) \times 1/3$ or 33.3-percent) and the 2011 and 2012 tax years on an aggregate basis ($(\$700 + \$700)/(\$1,000 + \$1,000) \times 2/3$ or 46.7 percent). Therefore, for the 2013 tax year, the domestic company meets the 80-percent active foreign business requirements, and its active foreign business percentage is 80 percent.

For the 2014 tax year, the transition rule does not apply since none of the years within the three-year testing period begin before January 1, 2011. As a result, the domestic company does not meet the 80-percent foreign business requirements for the 2014 tax year since only 70 percent ($(\$700 + \$700 + \$700)/(\$1,000 + \$1,000 + \$1,000)$) of its gross income from all sources for the testing period is active foreign business income.

An existing 80/20 company does not meet the grandfather rule if there has been an addition of a substantial line of business with respect to such corporation after the date of enactment of this provision. For purposes of determining whether a substantial line of business has been added, rules similar to those of section 7704(g) and the Treasury regulations thereunder

¹⁸² Hence, this percentage is determined without application of the new aggregation rule.

(relating to certain publicly-traded partnerships treated as corporations) apply. It is anticipated that the Secretary will issue guidance providing that the acquisition of foreign operating assets or stock of a foreign corporation by the existing 80/20 company for the purpose of increasing its active foreign business percentage will be treated as the addition of a substantial line of business.

The repeal of the 80/20 company provisions relating to the payment of interest does not apply to payments of interest to persons not related to the 80/20 company (applying rules similar to those of section 954(d)(3)) on obligations issued before the date of enactment.¹⁸³ For this purpose, a significant modification of the terms of any obligation (including any extension of the term of such obligation) is treated as the issuance of a new obligation.

Effective Date

The provision is effective for taxable years beginning after December 31, 2010.

¹⁸³ A person will be treated as a related person with respect to a controlled foreign corporation if (A) such person is an individual, corporation, partnership, trust or estate which controls, or is controlled by, the controlled foreign corporation, or (B) such person is a corporation, partnership, trust or estate which is controlled by the same person or persons which control the resident controlled foreign corporation. For purposes of the preceding sentence, control means, with respect to a corporation, the ownership, directly or indirectly, of stock possessing more than 50 percent of the total voting power of all classes of stock entitled to vote or of the total value of stock of such corporation. In the case of a partnership, trust, or estate, control means the ownership, directly or indirectly, of more than 50 percent (by value) of the beneficial interests in such partnership, trust, or estate. For purposes of this paragraph, rules similar to the rules of section 958 shall apply. Sec. 954(d)(3).

H. Source Rules for Income on Guarantees
(sec. 308 of the bill and secs. 861, 862 and 864 of the Code)

Present Law

The United States taxes U.S. citizens and residents (including domestic corporations) on their worldwide income, whether derived in the United States or abroad. The United States generally taxes nonresident alien individuals and foreign corporations engaged in a trade or business in the United States on income that is effectively connected with the conduct of such trade or business (sometimes referred to as “effectively connected income”). The United States also taxes nonresident alien individuals and foreign corporations on certain U.S.-source income that is not effectively connected with the conduct of a U.S. trade or business.

Income of a nonresident alien individual or foreign corporation that is effectively connected with the conduct of a trade or business in the United States generally is subject to U.S. tax in the same manner and at the same rates as income of a U.S. person. Deductions are allowed to the extent that they are connected with effectively connected income.¹⁸⁴ A foreign corporation also is subject to a flat 30-percent branch profits tax on its “dividend equivalent amount,” which is a measure of the effectively connected earnings and profits of the corporation that are removed in any year from the conduct of its U.S. trade or business.¹⁸⁵ In addition, a foreign corporation is subject to a flat 30-percent branch-level excess interest tax on the excess of the amount of interest that is deducted by the foreign corporation in computing its effectively connected income over the amount of interest that is paid by its U.S. trade or business.¹⁸⁶

Subject to a number of exceptions, U.S.-source fixed or determinable, annual or periodical income (“FDAP”) of a nonresident alien individual or foreign corporation that is not effectively connected with the conduct of a U.S. trade or business is subject to U.S. tax at a rate of 30 percent of the gross amount paid.¹⁸⁷ Items of income within the scope of FDAP include, for example, interest, dividends, rents, royalties, salaries, and annuities. The tax generally is collected by means of withholding.¹⁸⁸

Present law provides detailed rules for the determination of whether income is from U.S. sources or foreign sources. For example, the source of compensation for services is generally determined by the location in which the services were performed, regardless of the country of

¹⁸⁴ Secs. 864(c), 871(b), 873, 882(a) and 882(c).

¹⁸⁵ Sec. 884.

¹⁸⁶ Sec. 884(f).

¹⁸⁷ Secs. 871(a), 881(a).

¹⁸⁸ Sec. 1441 and 1442 provide for withholding from payments to nonresident aliens and foreign corporations, respectively.

residence of the payor.¹⁸⁹ In contrast, the source of interest income is generally determined by reference to the country of residence of the obligor.¹⁹⁰ As a result, interest paid by a U.S. obligor typically is considered U.S.-source income, while interest paid by a foreign obligor is treated as foreign-source income. Rents and royalties paid for the use of property located in the United States are considered to be U.S.-source income.¹⁹¹

To the extent that the source of income is not specified in the statute, the Secretary may promulgate regulations that allocate or apportion such income to sources within or without the United States.¹⁹² Many items of income are not explicitly addressed by either the statute or the regulations. On several occasions, courts have determined the source of such items by applying the rule for the type of income to which the disputed income is most closely analogous, based on all facts and circumstances.¹⁹³ As a result, items as dissimilar as alimony and letters of credit commissions were sourced by analogy to interest.¹⁹⁴ The U.S. Tax Court, in *Container Corp. v. Commissioner*,¹⁹⁵ recently rejected IRS arguments that fees paid by a domestic corporation to its foreign parent with respect to guarantees issued by the parent for the debts of the U.S. subsidiary were analogous to interest for purposes of determining the source of such payments. The Tax Court held that the payments were more closely analogous to compensation for services, and determined that the source of the fees should be determined by reference to the residence of the foreign parent-guarantor. As a result, the income was treated as income from foreign sources.

Explanation of Provision

This provision effects a legislative override of the opinion in *Container Corp. v. Commissioner*, *supra*, by amending the source rules of section 861 and 862 to address income from guarantees issued after the date of enactment. Under section 861(a)(9), income from sources within the United States includes amounts received, whether directly or indirectly, from a noncorporate resident or a domestic corporation for the provision of a guarantee of indebtedness of such person. The scope of the provision includes payments that are made indirectly for the provision of a guarantee. For example, the provision would treat as income from U.S. sources a guarantee fee paid by a foreign bank to a foreign corporation for the foreign

¹⁸⁹ Under section 861(a)(3), compensation for personal services performed in the United States is generally U.S. source. Conversely, section 862(a)(3) provides that compensation for labor or services performed outside the United States is foreign source.

¹⁹⁰ Secs. 861(a)(1), 862(a)(1).

¹⁹¹ Sec. 861(a)(4).

¹⁹² Sec. 863.

¹⁹³ *See, Hunt v. Commissioner*, 90 T.C. 1289 (1988).

¹⁹⁴ *Manning v. Commissioner*, T.C. Memo. 1979-146, *aff'd* 614 F.2d 815 (1st Cir. 1980); *Bank of America v. United States*, 230 Ct. Cl. 679, 680 F.2d 142 (1982), *aff'g* in part, *rev'g* in part, 47 AFTR 2d 81-652 (Ct. Cl. 1981).

¹⁹⁵ *Container Corp. v. Commissioner*, 134 T.C. No. 5 (February 17, 2010), *gov't notice of appeal filed* (5th Cir. June 1, 2010).

corporation's guarantee of indebtedness owed to the bank by the foreign corporation's domestic subsidiary, where the cost of the guarantee fee is passed on to the domestic subsidiary through, for example, additional interest charged on the indebtedness.

Such U.S.-source income also includes amounts received from a foreign person, whether directly or indirectly, for the provision of a guarantee of indebtedness of that foreign person if the payments received are connected with income which is effectively connected with conduct of a U.S. trade or business. A conforming amendment to section 862 provides that amounts received from a foreign person, whether directly or indirectly, for the provision of a guarantee of that person's debt, are treated as foreign source income if they are not from sources within the United States as determined under section 861(a)(9).

For purposes of this provision, the phrase “noncorporate residents” has the same meaning as for purposes of section 861(a)(1), except that foreign partnerships are not included. Payments received from a foreign partnership for the provision of a guarantee of indebtedness of that foreign partnership are U.S. source if the amounts received are connected with income which is effectively connected with the conduct of a U.S. trade or business. A conforming amendment to section 864 provides that amounts received, whether directly or indirectly, for the provision of a guarantee are deemed to be effectively connected with the conduct of a U.S. trade or business if derived in the active conduct of a banking, financing or similar business.

Although this provision overturns the opinion in *Container Corp. v. Commissioner*, *supra*, no inference is intended with respect to the source of income received for the provision of a guarantee issued before the date of enactment. The Secretary may provide rules for determining the source of other types of payments that are not within the scope of this provision.

Effective Date

The provision applies to guarantees issued after the date of enactment. No inference is intended with respect to the source of income received for the provision of a guarantee issued before the date of enactment.

**I. Modification of Statute of Limitations for Failure
to Disclose Certain Foreign Transactions
(sec. 309 of the bill and sec. 6501(c) of the Code)**

Present Law

Taxes are generally required to be assessed within three years after a taxpayer's return was filed, whether or not it was timely filed.¹⁹⁶ In the case of a false or fraudulent return filed with the intent to evade tax, or if the taxpayer fails to file a required return, the tax may be assessed, or a proceeding in court for collection of such tax may be begun without assessment, at any time.¹⁹⁷ The limitation period also may be extended by taxpayer consent.¹⁹⁸ If a taxpayer engages in a listed transaction but fails to include any of the information required under section 6011 on any return or statement for a taxable year, the limitation period with respect to such transaction will not expire before the date which is one year after the earlier of (1) the date on which the Secretary is provided the information so required, or (2) the date that a "material advisor" (as defined in section 6111) makes its section 6112(a) list available for inspection pursuant to a request by the Secretary under section 6112(b)(1)(A).¹⁹⁹ In addition to the exceptions described above, there are also circumstances under which the three-year limitation period is suspended.²⁰⁰

Section 6501(c)(8) provides an exception to the three-year period of limitations due to failures to provide information about cross-border transactions or foreign assets. Under this exception, the limitation period for assessment of tax does not expire any earlier than three years after the required information about certain cross-border transactions or foreign assets is actually provided to the Secretary by the person required to file the return.²⁰¹ In general, such information reporting is due with the taxpayer's return; thus, the three-year limitation period commences when a timely and complete return (including all information reporting) is filed. Without the inclusion of the information reporting with the return, the limitation period does not

¹⁹⁶ Sec. 6501(a). Returns that are filed before the date they are due are deemed filed on the due date. See sec. 6501(b)(1) and (2).

¹⁹⁷ Sec. 6501(c).

¹⁹⁸ Sec. 6501(c)(4).

¹⁹⁹ Sec. 6501(c)(10).

²⁰⁰ For example, service of an administrative summons triggers the suspension either (1) beginning six months after service (in the case of John Doe summonses) or (2) when a proceeding to quash a summons is initiated by a taxpayer named in a summons to a third-party record-keeper. Judicial proceedings initiated by the government to enforce a summons generally do not suspend the limitation period.

²⁰¹ Required information reporting subject to this three-year rule is reporting under sections 6038 (certain foreign corporations and partnerships), 6038A (certain foreign-owned corporations), 6038B (certain transfers to foreign persons), 6038D (individuals with foreign financial assets), 6046 (organizations, reorganizations, and acquisitions of stock of foreign corporations), 6046A (interests in foreign partnerships), and 6048 (certain foreign trusts), as well as information required with respect to elections under sections 1295(b) passive foreign investment corporations.

commence until such time as the information reports are subsequently provided to the Secretary, even though the return has been filed. The taxes that may be assessed during this suspended or extended period are not limited to those attributable to adjustments to items related to the information required to be reported by one of the enumerated sections.

Explanation of Provision

The provision modifies the scope of the exception to the limitations period if a failure to provide information on cross-border transactions or foreign assets is shown to be due to reasonable cause and not willful neglect. In the absence of reasonable cause or the presence of willful neglect, the suspension of the limitations period and the subsequent three-year period that begins after information is ultimately supplied apply to all issues with respect to the income tax return. In cases in which a taxpayer establishes reasonable cause, the limitations period is suspended only for the item or items related to the failure to disclose. In order to prove reasonable cause, it is anticipated that a taxpayer must establish that the failure was objectively reasonable (i.e., the existence of adequate measures to ensure compliance with rules and regulations), and in good faith.

For example, the limitations period for assessing taxes with respect to a tax return filed on March 31, 2011 ordinarily expires on March 31, 2014. In order to assess tax with respect to any issue on the return after March 31, 2014, the IRS must be able to establish that one of the exceptions applies. If the taxpayer fails to attach to that return one of multiple information returns required, the limitations period does not begin to run unless and until that missing information return is supplied. Assuming that the missing report is supplied to the IRS on January 1, 2013, the limitations period for the entire return begins, and elapses no earlier than three years later, on January 1, 2016. All items are subject to adjustment during that time, unless the taxpayer can prove that reasonable cause for the failure to file existed. If the taxpayer establishes reasonable cause, the only adjustments to tax permitted after March 31, 2014 are those related to the failure to file the information return. For this purpose, related items include (1) adjustments made to the tax consequences claimed on the return with respect to the transaction that was the subject of the information return, (2) adjustments to any item to the extent the item is affected by the transaction even if it is otherwise unrelated to the transaction, and (3) interest and penalties that are related to the transaction or the adjustments made to the tax consequences.

Effective Date

The provision applies to returns filed after March 18, 2010, the date of enactment of “Hiring Incentives to Restore Employment Act,” Public Law 111-147, as well as for any other return for which the assessment period specified in section 6501 had not yet expired as of that date.

TITLE IV – BUDGETARY PROVISIONS

A. Time for Payment of Corporate Estimated Taxes (sec. 402 of the bill and sec. 6655 of the Code)

Present Law

In general, corporations are required to make quarterly estimated tax payments of their income tax liability.²⁰² For a corporation whose taxable year is a calendar year, these estimated tax payments must be made by April 15, June 15, September 15, and December 15. In the case of a corporation with assets of at least \$1 billion (determined as of the end of the preceding taxable year):

(i) payments due in July, August, or September, 2014, are increased to 174.25 percent of the payment otherwise due,²⁰³

(ii) payments due in July, August or September, 2015, are increased to 122.25 percent of the payment otherwise due,²⁰⁴ and

(iii) payments due in July, August or September, 2019, are increased to 106.5 percent of the payment otherwise due.²⁰⁵

For each of the periods impacted, the next required payment is reduced accordingly.

Explanation of Provision

The provision increases the required payment of estimated tax otherwise due in July, August, or September, 2015, by 3.0 percentage points.

Effective Date

The provision is effective on the date of enactment of the bill.
