<sup>1/</sup> Expanded Income is equal to Adjusted Gross Income plus excluded capital gains and other tax preference items less investment interest paid to the extent of investment income.

<sup>2/</sup> Revenue gain from not adjusting personal exemption, zero bracket amount, and rate brackets by 46.0, 28.6, or 14.7 percent. These adjustments correspond to actual and forecasted rates of CPI-U inflation measured concurrently over periods beginning with the date shown and ending with 1984. Revenue gain evaluated against 1979 tax schedules.

<sup>3/</sup> Additional employee and self-employed payroll tax from ad hoc increases in the wage base above what would have occurred under indexing (equivalent in 1982 to \$3,300 for the two increases that occurred after 1979 and to \$1,800 for the single increase that occurred after 1980), and from increases in rates for employees from 6.13 percent to 6.65 percent in 1981 and to 6.7 percent in 1982, and from increases in rates for the self-employed from 8.1 percent to 9.3 percent in 1981 and to 9.35 percent in 1982. Does not include expanding HI coverage to Federal employees or effects of 1983 social security legislation.

<sup>4/</sup> ERTA provisions in the distribution include: the two-earner deduction, full three-year rate changes covering both regular and alternative minimum tax rates, charitable deduction for non-itemizers, and modifications to the child care credit.

<sup>5/</sup> TEFRA provisions in the distribution include: conversion to a new minimum tax, limitation on both medical expense and casualty loss deductions, and expanded taxation of unemployment compensation.
