INTRODUCTION

This document¹ provides a comparison of Superfund financing provisions and proposals under present law (prior law for the Superfund tax provisions, which expired after September 30, 1985),² H.R. 2817 as reported by the authorizing committees in the House, and possible amendments for consideration by the Committee on Ways and Means at the scheduled markup on October 17, 1985.

H.R. 2817 was reported by the Committee on Energy and Commerce on August 1, 1985 (H. Rep. No. 99-253, Part 1). The bill was also referred to the Committees on Judiciary, Merchant Marine and Fisheries, Public Works and Transportation, and Ways and Means. The Committee on Merchant Marine and Fisheries approved H.R. 2817 with amendments on October 1, 1985; the Committee on Judiciary approved the bill with amendments on October 8, 1985; and the Committee on Public Works and Transportation approved the bill with amendments on October 10, 1985. (Committee reports have not yet been filed by the Committees on Merchant Marine and Fisheries, Judiciary, and Public Works and Transportation.)

¹ This document may be cited as follows: Joint Committee on Taxation, Superfund Financing Provisions and Proposals (H.R. 2817 and Possible Amendments) (JCX-25-85), October 16, 1985.

² A 45-day extension of the then existing Superfund taxes was approved by the Committee on Ways and Means on September 27, 1985, and passed by the House on October 1, 1985 (H.R. 3453). On October 9, 1985, the Senate deleted the Superfund tax extension from the bill and passed the bill with an amendment relating to the Federal Financing Bank. No further action has occurred with respect to H.R. 3453.

The Senate passed a 5-year extension of the prior Superfund taxes (along with other Superfund tax amendments) on September 26, 1985, as an amendment to H.R. 2005 (provisions of S. 51 as amended by the Senate). No further action has occurred with respect to H.R. 2005.

SUPERFUND

Item	Present Law	H.R. 2817 *	Possible Amendment
<p>I. Hazardous Substance Response Trust Fund ("Superfund")</p> <p>A. <u>Overall funding level</u></p> <p>B. <u>General revenue appropriations</u></p>	<p>Provided for deposits of tax revenues and general revenue appropriations into the Superfund intended to total \$1.6 billion for fiscal years 1981-1985.</p> <p>There is authorized to be appropriated to the Superfund an aggregate of \$220 million over fiscal years 1981 through 1985 (\$44 million per year) from general revenues (13.75 percent of total funding).</p>	<p>Provides for deposits of tax revenues and general revenue appropriations into the Superfund to total \$10 billion for fiscal years 1986-1990.</p> <p>There would be authorized to be appropriated to the Superfund, from general revenues, an aggregate of \$1.25 billion over fiscal years 1986 through 1990 (\$250 million per year) (12.5 percent of total funding). For each year, previously authorized (but unappropriated) amounts could also be appropriated.</p> <p>General revenue authorizations would be reduced, in any year, by the amount of recoveries from responsible parties in the preceding year (see D below).</p> <p>*Unless otherwise indicated, this column reflects H.R. 2817 as reported by the Committee on Energy and Commerce.</p>	<p>Provides for deposits of revenues, general revenue appropriations, and borrowing authority intended to total \$1 billion in Superfund revenues fiscal years 1986-1990 (including interest and recoveries).</p> <p>There would be authorized to be appropriated to the Superfund \$1.38 billion over fiscal years 1986 through 1990 (\$275 million per year) from general revenues (13.75 percent of total funds). For each year, previously authorized (but unappropriated) amounts could also be appropriated.</p>

SUPERFUND

Item	Present Law	H.R. 2817	Possible Amendment
<p>B. <u>General revenue appropriations</u> (Cont'd)</p>		<p><u>Alternative import tax.</u>--The amount of the general revenue authorization would further be reduced proportionately if a tax on imported products manufactured from taxable feedstock chemicals, designed to raise \$700 million over the 5-year period, is enacted. (The tax on feedstock chemicals is described below).</p> <p>(Under an amendment approved by the Committee on Public Works and Transportation, an ad valorem tax would be imposed, effective January 1, 1986, on the sale of imported substances directly or substantially manufactured or produced from materials consisting of one or more taxable feedstock chemicals. The tax would be designed to raise \$1.5 billion over the 5-year period, and would be in addition to (rather than a substitute for) general revenue appropriations.)</p>	<p><u>Study of import tax.</u>--The Secretary of the Treasury (in consultation with the International Trade Commission) would study the desirability and feasibility of imposing a tax on imported derivatives of taxable chemical feedstocks. Such study would be submitted by the Secretary of the Treasury to the Committee on Ways and Means not later than December 31, 1986.</p>

Item	Present Law	H.R. 2017	Possible Amendment
D. <u>Other financing sources</u>	<p>The following amounts are also deposited in the Superfund:</p> <ul style="list-style-type: none">(1) amounts recovered from parties responsible for hazardous substance releases;(2) penalties assessed against responsible parties;(3) punitive damages for failure to provide removal or remedial action upon order of the President; and(4) interest on Trust Fund balances.	Same as present law.	Same as present law.

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
<p>E. <u>Expenditure purposes</u></p>	<p>Amounts in the Superfund are available for expenditures incurred in connection with releases or threats of releases of hazardous substances into the environment.</p> <p>Allowable costs include:</p> <p>(1) costs of responding to the presence of hazardous substances on land or in the water or air, including cleanup and removal of such substances and remedial action;</p> <p>(2) certain costs related to response, including natural resources damage assessment, epidemiologic studies, and maintenance of emergency strike forces; and</p>	<p>(1) Same as present law.</p> <p>(2) Same as present law, except:</p> <p>(a) Deletes costs relating to natural resource damage assessments.</p> <p>(Under amendments approved by the Committee on Merchant Marine and Fisheries and the Committee on Public Works and Transportation, natural resource damage assessments would be reinstated as an expenditure purpose.)</p>	<p>(1) Same as present law.</p> <p>(2)(a) Delete costs relating to natural resource damage assessments.</p>

/

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
E. <u>Expenditure purposes</u> (Cont'd)		<p>(b) Adds costs incurred in connection with health assessment studies regarding individual facilities; costs incurred in preparing toxicological profiles of certain hazardous substances; costs of a hazardous substance research and training program, not to exceed \$113 million over the 5-year period; oversight costs for certain private remedial activities; and costs incurred in evaluating potential hazards posed by releases pursuant to petitions filed by any person.</p> <p>(Under the amendment approved by the Committee on Public Works and Transportation, expenditures would also be permitted for</p> <p>(i) research, development, and demonstration costs associated with alternative remedial technologies, not to exceed \$25 million per year,</p>	<p>(2)(b) Same as H.R. 2817 (including additions by the Committee on Public Works and Transportation).</p>

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
E. <u>Expenditure purposes</u> (Cont'd)	<p>(3) payment of damage claims for injury to, or destruction or loss of, natural resources belonging to or controlled by Federal or State governments. No more than 15 percent of Superfund revenues attributable to taxes and general revenue appropriations may be used for the payment of natural resource damage claims.</p>	<p>(ii) grants for university hazardous waste research centers, not to exceed \$10 million per year, and</p> <p>(iii) costs of enforcement (as well as oversight) with respect to private remedial activities.)</p> <p>(3) Deletes natural resource damage claims as a permitted expenditure purpose.</p> <p>(The amendment approved by the Committee on Public Works and Transportation would retain natural resource damage claims as a permitted expenditure purpose. That amendment would also repeal a present law prohibition against payment of claims associated with injuries or losses resulting from long-term exposure to air pollution from multiple or diverse sources).</p>	<p>(3) Delete natural resource damage claims as a permitted expenditure purpose.</p>

SUPERFUND

9a

Item	Present Law	N.R. 2017	Possible Amendment
<p>6. <u>Expenditure purposes</u> (Cont'd)</p>	<p>(6) No provision.</p>	<p>(6) Superfund monies generally are available for transfer of hazardous waste.</p>	<p>(6) No Superfund monies are available for transfer of any hazardous substance from a facility at which a release (or threatened release) has occurred to a facility for which a final permit is in effect under section 3005(a) of the Solid Waste Disposal Act, if</p> <p>(1) such permit was issued after January 1, 1983, and before November 1, 1984, and</p> <p>(2) the transfer is carried out pursuant to a cooperative agreement between the EPA Administrator and the State (sec. 121(i) of the Energy and Commerce bill).</p>

SUPERFUND

Item	Present Law	N.R. 2017	Possible Amendment
<p>F. <u>Petroleum-related releases.</u></p>	<p>Petroleum releases (unless specifically covered by certain environmental laws), and releases of natural or synthetic gases, are not covered by the Superfund. Additionally, the fund may not be used to cover costs associated with workplace releases, certain nuclear releases, or releases associated with engine exhausts or the normal application of fertilizer.</p>	<p>A Petroleum Release Response Account would be established within the Superfund, to be available for cleanup and related costs associated with leaking underground storage tanks containing petroleum products. This account would be funded by</p> <ul style="list-style-type: none"> (i) a separate, unspecified tax or taxes intended to raise \$1.25 billion over fiscal years 1986 through 1990, (ii) interest on account balances, and (iii) recoveries from responsible parties under section 9003(h) of the Solid Waste Disposal Act. <p>No tax would be imposed during fiscal year 1988, 1989, or 1990 if the unobligated balance in the account exceeded \$250 million on the preceding September 30.</p> <p>(The amendment approved by the Committee on Public Works and Transportation would raise \$0.9 billion over the period in unspecified taxes for the Petroleum Release Response Account. Such taxes would be suspended during any calendar quarter if the account balance exceeded \$100 million at the close of the preceding quarter.)</p>	<p>A separate Petroleum Release Response Trust Fund would be established, to be available for cleanup and related costs associated with leaking underground storage tanks containing petroleum products. The trust fund would be funded by</p> <ul style="list-style-type: none"> (i) an 0.2-cent per gallon tax on gasoline, diesel fuel, and special motor fuels so by a producer or importer, using the same tax base and collection procedures as the present law excise taxes on gasoline (secs. 4041 and 4081 of the Code), (ii) interest on balances in the trust fund, and (iii) recoveries from responsible parties under section 9003(h) of the Solid Waste Disposal Act. <p>The gasoline tax would expire on September 30, 1990. However, no further tax would be imposed if, on any date before September 30, 1990, if cumulative revenues from the tax exceeded \$850 million.</p>

SUPERFUND

Item	Present Law	H.R. 2817	Possible Amendment
G. <u>Limitation on Liability</u>	<p>Claims against the Superfund may be paid only out of the fund.</p> <p>If claims against the Superfund exceed the balance available for payment of those claims, the claims are to be paid in full in the order in which they are finally determined.</p>	<p>Same as present law.</p>	<p>Same as present law. (A parallel limitation would apply with respect to the Petroleum Release Response Trust Fund.)</p>
H. <u>Borrowing authority</u>	<p>The Superfund has authority to borrow from general Treasury funds for the purposes of paying response costs in connection with a catastrophic spill or paying natural resource claims. Outstanding advances at any time may not exceed estimated tax revenues for the following 12 months; advances for paying natural resource claims may not exceed 15 percent of such revenues. All advances must be repaid by September 30, 1985.</p>	<p>No extension of borrowing authority after September 30, 1985.</p>	<p>The Superfund would have authority to borrow, at any time during the 5-year period, a maximum amount equal to \$10 billion reduced by current and projected tax revenues, general revenue appropriations, interest, and recoveries. (Assuming the projections contained in C above, this would constitute \$1.90 billion of aggregate borrowing authority.) Taxes (not including the gasoline tax to fund the Petroleum Release Response Trust Fund) would be extended beyond September 30, 1990, if necessary to repay borrowings made during the 5-year period (with interest).</p>

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
<p>I. <u>Termination date</u></p>	<p>The petroleum and feedstock chemical taxes expired on September 30, 1985.</p>	<p>The Superfund taxes would expire on September 30, 1990. (Certain taxes would be suspended or terminated earlier than September 30, 1990, under conditions described below.)</p>	<p>The Superfund taxes would expire on September 30, 1990. Taxes (other than the gasoline tax used to fund the Petroleum Release Response Trust Fund) would be extended beyond September 30, 1990, for as long as necessary to repay with interest authorized borrowings made by the Superfund during the 5-year period reauthorization period (see H. above)</p>
<p>J. <u>Location of trust fund provisions</u></p>	<p>The Superfund is created as a fund in the Treasury under CERCLA, but is not included under the trust fund code of the Internal Revenue Code.</p>	<p>No provision.</p>	<p>The Superfund would be established as a trust fund under the Internal Revenue Code.</p>

Item	Present Law	H.R. 2617	Possible Amendment
<u>Effective Date</u>		<p><u>Effective date.</u>--The extension of the petroleum and feedstock taxes would be effective October 1, 1985. No separate effective date is stated for the remaining tax and trust fund provisions; however, the substantive provisions generally apply with respect to fiscal years 1986 through 1990.</p>	<p><u>Effective date.</u>--The amendments to the petroleum and feedstocks taxes, the new gasoline tax, and the amendments to the trust fund provisions would be effective November 1, 1985. At the election of the taxpayer, present law petroleum and feedstocks taxes would remain in effect from October 1, 1985, through October 31, 1985.</p> <p>The repeal of natural resource damage claims as a fund expenditure purpose would be effective November 1, 1985.</p> <p>The new waste management tax would be effective January 1, 1986.</p>

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
II. Petroleum Tax			
A. <u>Imposition of tax</u>	<p>An excise tax of 0.79 cent per barrel is imposed on</p> <p>(1) crude oil received at a U.S. refinery; and</p> <p>(2) petroleum products (including crude oil, natural and refined gasoline, refined and residual oil, and certain other liquid hydrocarbon products) imported into the U.S. for consumption, use, or warehousing.</p>	Same as present law.	The tax would be increased to 6.4 cents per barrel.

SUPERFUND

Item	Present Law	H.R. 2817	Possible Amendment
B. <u>Termination date</u>	<p>The tax expires on September 30, 1985.</p> <p>The tax would have been suspended for the next calendar year if--</p> <p>(1) on September 30, 1983, or 1984, the fund balance had exceeded \$900 million, and</p> <p>(2) absent the petroleum and feedstock taxes, the fund would have exceeded \$500 million on the next September 30.</p> <p>(As of September 30, 1984, the unobligated balance in the Fund was \$295.1 million.)</p> <p>Further, authority to collect the tax terminates when cumulative receipts from petroleum tax and feedstocks chemicals tax reach \$1.38 billion.</p>	<p>The tax would expire September 30, 1990.</p> <p>The tax would be suspended for the next calendar year if--</p> <p>(1) on September 30, 1988, or 1989, the fund balance exceeds \$4.9 billion, and</p> <p>(2) absent the petroleum and feedstock taxes, the fund would exceed \$2.7 billion on the next September 30.</p>	<p>The tax would expire September 30, 1990; however, the tax would be extended beyond September 30, 1990, together with the feedstock and waste end taxes, if necessary to repay Superfund borrowings during the 5-year reauthorization period.</p>

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
<p>III. Tax on Feedstock Chemicals</p> <p>A. <u>Imposition of tax</u></p>	<p>A tax is imposed on the sale of 42 organic and inorganic substances ("feedstock chemicals") by a manufacturer, producer, or importer, at the rates listed in Table A (attached). The tax rates were set in 1980 and were limited to the lower of 2-percent of wholesale prices or</p> <p>(1) \$4.87 per ton for petrochemicals, and</p> <p>(2) \$4.45 per ton for inorganic feedstocks.</p> <p>(Certain chemicals are taxed at lower rates than would be arrived at under this formula.)</p> <p>The feedstock chemicals tax applies to chemicals manufactured in the U.S. (as defined for purposes of the petroleum tax) or imported into the U.S. for consumption, use, or warehousing. If a taxpayer uses a taxable feedstock prior to sale, the tax is imposed on such use.</p> <p>If one taxable chemical is used to produce a second, the tax on the first chemical is allowed as a credit against the second tax (to the extent of that second tax).</p>	<p>Same as present law.</p>	<p>Tax would be imposed on present law feedstocks and, additionally, lead. The tax rates would be set at the lower of 2 percent of current estimated wholesale price or</p> <p>(1) \$4.87 per ton for petrochemicals, and</p> <p>(2) \$4.45 per ton for inorganic feedstocks,</p> <p>but not lower than the present law rate for any presently taxed chemical (see table A).</p> <p>Beginning in 1987, the tax rates would be indexed annually for inflation, as measured by the average producer price index for organic or inorganic chemicals, but would not be reduced below 1986 rates.</p>

SUPERFUND

Item	Present Law	H.R. 2817	Possible Amendment
B. <u>Exceptions to tax</u>	<p>Exceptions to the feedstock chemicals tax are provided for:</p> <p>(1) Butane or methane used as a fuel.</p> <p>(2) Nitric acid, sulfuric acid, ammonia, or methane used to produce ammonia, if used to produce fertilizer.</p> <p>(3) Sulfuric acid produced solely as a by-product of (and on same site as) air pollution control equipment.</p> <p>(4) Any taxable feedstock to the extent derived from coal.</p> <p>(5) Petrochemicals used to manufacture or produce motor fuel, diesel fuel, aviation fuel, or jet fuel.</p> <p>(6) Cupric sulfate, cupric oxide, cuprous oxide, zinc chloride, zinc sulfate, barium sulfide or lead oxide which exist in transitory form in the process of refining non-taxable metal ores or compounds into other (or purer) non-taxable compounds.</p>	<p>Modifies present law exceptions as follows:</p> <p>(1) Retains present law exception.</p> <p>(2) Retains present law exception.</p> <p>(3) Retains present law exception.</p> <p>(4) Retains present law exception.</p> <p>(5) Retains present law exception.</p> <p>(6) Retains present law exception.</p>	<p>Modifies present law exceptions as follows:</p> <p>(1) Retains present law exception.</p> <p>(2) Retains present law exception.</p> <p>(3) Retains present law exception.</p> <p>(4) Repeals exception.</p> <p>(5) Retains present law exception.</p> <p>(6) Retains present law exception with addition of lead.</p>

SUPERFUND

Item	Present Law	H.R. 2017	Possible Amendment
B. <u>Exceptions to tax</u> <u>(cont.)</u>	(7) No provision.	(7) Nitric acid, sulfuric acid, ammonia, or methane used to produce ammonia, if used (or sold for ultimate use) in the manufacturer or production of animal feed. <u>Effective date.</u> --October 1, 1985.	(7) Retain present law (no exemption). <u>Effective date.</u> --November 1985.
C. <u>Treatment of</u> <u>exported</u> <u>feedstocks</u>	No exemption is provided for exports of taxable feedstocks.	No provision.	Taxable feedstocks sold for export by the manufacturer or producer, or for resale by a second purchaser for export, would be exempt from tax. If tax is paid on a chemical, and the chemical is later exported, a credit or refund would be allowed to the person who paid the tax. <u>Effective date.</u> --November 1985.

SUPERFUND

Item	Present Law	H.R. 2817	Possible Amendment
<p>D. <u>Clarification of tax treatment of xylene</u></p>	<p>Treasury has taken the position that xylene includes separated isomers of xylene for purposes of the feedstock tax.</p>	<p>No provision.</p>	<p>It would be clarified that, except for imports and exports, xylene does not include separated isomers for purposes of the feedstock tax. Separation of xylene isomers would constitute use of a mixed stream of xylene and would be a taxable event.</p> <p><u>Effective date.</u>--The provision generally would be effective November 1, 1985.</p> <p>Taxes previously imposed on xylene (i.e., since 1980) would be refunded or credited to the taxpayers. To compensate for lost revenues, the tax rate on xylene would be increased prospectively (see table A).</p>

SUPERFUND

α υ

Item	Present Law	H.R. 2017	Possible Amendment
<p>E. <u>Treatment of exchanges</u></p>	<p>Under proposed Treasury regulations, exchanges of taxable chemicals are treated as sales.</p>	<p>No provision.</p>	<p>Subject to registration and notification requirements, where inventories of taxable chemicals are exchanged, tax would be imposed only upon the later sale or use of the chemical by the person receiving the chemical in the exchange. This rule would not apply if the receiving person would not be taxable on the sale of the chemical, unless such treatment would be as a result of the export exemption (item C above).</p> <p><u>Effective date.</u>--The amendment regarding inventory exchanges would apply retroactively to the original effective date of the feedstocks tax (April 1, 1981). However, the amendment would not apply to any exchange before January 1, 1980, if the manufacturer, producer, or importer treated the exchange as a taxable sale.</p> <p>The registration and notification requirements would apply to exchanges after December 31, 1985.</p>

Item	Present Law	H.R. 2817	Possible Amendment
F. <u>Expiration of tax</u>	The tax expired on September 30, 1985. The tax would have been suspended or terminated earlier under the same conditions as applied for the petroleum tax.	The tax would expire on September 30, 1990, or earlier under conditions specified for the petroleum tax.	The tax would expire on September 30, 1990; however, the tax would be extended beyond September 30, 1990, together with the petroleum and waste management taxes, for so long as necessary to repay amounts borrowed by the Superfund during fiscal years 1986-1990.
IV. Waste Management Tax	No provision. (A dry weight tax on hazardous waste is imposed under present law for purposes of funding the Post-closure Liability Trust Fund, discussed in VI., below.)	H.R. 2817, as reported by the Committee on Energy and Commerce, states that a waste end tax is to be imposed sufficient to raise \$1.5 billion over fiscal years 1986 through 1990.	A waste management tax would be imposed, designed to raise \$2 billion over fiscal years 1986 through 1990.
A. <u>In general</u>		(The amendment approved by the Committee on Public Works and Transportation would raise \$1.25 billion over the period from a waste end tax.)	
		<u>ADMINISTRATION PROPOSAL:</u>	
		H.R. 2817 does not specify details of a waste end tax. However, the Administration has proposed a waste management tax, intended to raise \$2.7 billion over fiscal years 1986 through 1990, as follows (this description reflects proposed Administration modifications to the proposal, which was originally contained in H.R. 1342):
