INTRODUCTION

This document,¹ prepared by the staff of the Joint Committee on Taxation, provides a summary of the present-law Federal tax system as in effect for 2017.

The current Federal tax system has four main elements: (1) an income tax on individuals and corporations (which consists of both a “regular” income tax and an alternative minimum tax);² (2) payroll taxes on wages (and corresponding taxes on self-employment income) to finance certain social insurance programs; (3) estate, gift, and generation-skipping taxes, and (4) excise taxes on selected goods and services. This document provides a broad overview of each of these elements.

A number of aspects of the Federal tax laws are subject to change over time. For example, some dollar amounts and income thresholds are indexed for inflation, including the standard deduction, tax rate brackets, and the annual gift tax exclusion. In general, the Internal Revenue Service adjusts these numbers annually and publishes the inflation-adjusted amounts in effect for tax years beginning in a calendar year prior to the beginning of that year. Where applicable, this document generally includes dollar amounts in effect for 2017 and notes whether dollar amounts are indexed for inflation.

In addition, a number of the provisions in the Federal tax laws have been enacted on a temporary basis or have parameters that vary by statute from year to year. For simplicity, this document describes the Federal tax laws in effect for 2017 and generally does not include references to provisions as they may be in effect for future years or to termination dates for expiring provisions.³

¹ This document may be cited as follows: Joint Committee on Taxation, *Overview of the Federal Tax System as in Effect for 2017* (JCX-17-17), March 15, 2017. This document can be found on the Joint Committee on Taxation website at www.jct.gov.

² If certain requirements are met, certain entities or organizations are exempt from Federal income tax. A description of such organizations is beyond the scope of this document. For a recent description, see Joint Committee on Taxation, *Report to the House Committee on Ways and Means on Present Law and Suggestions for Reform Submitted to the Tax Reform Working Groups* (JCS-3-13), May 6, 2013, pp. 19-58.

³ See Joint Committee on Taxation, *List of Expiring Federal Tax Provisions 2016-2026* (JCX-1-17), January 4, 2017.

I. SUMMARY OF PRESENT-LAW FEDERAL TAX SYSTEM

A. Individual Income Tax

In general

A United States citizen or resident alien generally is subject to the U.S. individual income tax on his or her worldwide taxable income.⁴ Taxable income equals the taxpayer's total gross income less certain exclusions, exemptions, and deductions. Graduated tax rates are then applied to a taxpayer's taxable income to determine his or her individual income tax liability. A taxpayer may face additional liability if the alternative minimum tax applies. A taxpayer may reduce his or her income tax liability by any applicable tax credits.

Adjusted gross income

Under the Internal Revenue Code of 1986 (the "Code"), gross income means "income from whatever source derived" except for certain items specifically exempt or excluded by statute.⁵ Sources of income include compensation for services, interest, dividends, capital gains, rents, royalties, alimony and separate maintenance payments, annuities, income from life insurance and endowment contracts (other than certain death benefits), pensions, gross profits from a trade or business, income in respect of a decedent, and income from S corporations, partnerships,⁶ estates or trusts.⁷ Statutory exclusions from gross income include death benefits payable under a life insurance contract, interest on certain State and local bonds, the receipt of property by gift or inheritance, as well as employer-provided health insurance, pension contributions, and certain other benefits.

⁴ Foreign tax credits generally are available against U.S. income tax imposed on foreign source income to the extent of foreign income taxes paid on that income. A nonresident alien generally is subject to the U.S. individual income tax only on income with a sufficient nexus to the United States. A U.S. citizen or resident who satisfies certain requirements for presence in a foreign country also is allowed a limited exclusion (\$102,100 in 2017) for foreign earned income and a limited exclusion of employer-provided housing costs. Sec. 911.

⁵ Sec. 61.

⁶ In general, partnerships and S corporations (*i.e.*, corporations subject to the provisions of subchapter S of the Code) are treated as pass-through entities for Federal income tax purposes. Thus, no Federal income tax is imposed at the entity level. Rather, income of such entities is passed through and taxed to the owners at the individual level. A business entity organized as a limited liability company ("LLC") under applicable State law generally is treated as a partnership for Federal income tax purposes if it has two or more members; a single-member LLC generally is disregarded as an entity separate from its owner for Federal income tax purposes.

⁷ In general, estates and most trusts pay tax on income at the entity level, unless the income is distributed or required to be distributed under governing law or under the terms of the governing instrument. Such entities determine their tax liability using a special tax rate schedule and are subject to the alternative minimum tax. Certain trusts, however, do not pay Federal income tax at the trust level. For example, certain trusts that distribute all income currently to beneficiaries are treated as pass-through or conduit entities (similar to a partnership). Other trusts are treated as being owned by grantors in whole or in part for tax purposes; in such cases, the grantors are taxed on the income of the trust.

An individual's adjusted gross income ("AGI") is determined by subtracting certain "above-the-line" deductions from gross income. These deductions include trade or business expenses, capital losses, contributions to a qualified retirement plan by a self-employed individual, contributions to certain individual retirement accounts ("IRAs"), certain moving expenses, certain education-related expenses, and alimony payments.⁸

Taxable income

To determine taxable income, an individual reduces AGI by any personal exemption deductions and either the applicable standard deduction or his or her itemized deductions.⁹ Personal exemptions generally are allowed for the taxpayer, his or her spouse, and any dependents. For tax year 2017, the amount deductible for each personal exemption is \$4,050. This amount is indexed annually for inflation. Additionally, the personal exemption phaseout reduces a taxpayer's personal exemptions by two percent for each \$2,500 (\$1,250 for married filing separately), or fraction thereof, by which the taxpayer's AGI exceeds \$261,500 (single), \$287,650 (head-of-household), \$313,800 (married filing jointly and surviving spouses) and \$156,900 (married filing separately).¹⁰ These threshold amounts are indexed for inflation.

A taxpayer also may reduce AGI by the amount of the applicable standard deduction. The basic standard deduction varies depending on a taxpayer's filing status. For 2017, the amount of the standard deduction is \$6,350 for single individuals and married individuals filing separately, \$9,350 for heads of households, and \$12,700 for married individuals filing jointly and surviving spouses. An additional standard deduction is allowed with respect to any individual who is elderly (*i.e.*, above age 64) or blind.¹¹ The amounts of the basic standard deduction and the additional standard deductions are indexed annually for inflation.

⁸ Sec. 62.

⁹ Sec. 63.

¹⁰ A taxpayer thus has all personal exemptions completely phased out at incomes of \$384,000 (single), \$410,150 (head-of-household), \$436,300 (married filing jointly) and \$218,150 (married filing separately).

¹¹ For 2017, the additional amount is \$1,250 for married taxpayers (for each spouse meeting the applicable criterion) and surviving spouses. The additional amount for single individuals and heads of households is \$1,550. If an individual is both elderly and blind, the individual is entitled to two additional standard deductions, for a total additional amount (for 2017) of \$2,500 or \$3,100, as applicable.

Table 1.—2017 Standard Deduction and Personal Exemption Values

Standard Deduction	
Married Filing Jointly	\$12,700
Head of Household	\$9,350
Single and Married Filing Separately	\$6,350
Personal Exemptions	\$4,050

In lieu of taking the applicable standard deductions, an individual may elect to itemize deductions. The deductions that may be itemized include State and local income taxes, real property and certain personal property taxes, home mortgage interest, charitable contributions, certain investment interest, medical expenses (in excess of 10 percent of AGI, or 7.5 percent in the case of taxpayers above age 64), casualty and theft losses (in excess of 10 percent of AGI and in excess of \$100 per loss), and certain miscellaneous expenses (in excess of two percent of AGI).¹² Additionally, the total amount of itemized deductions allowed is reduced by \$0.03 for each dollar of AGI in excess of \$261,500 (single), \$287,650 (head-of-household), \$313,800 (married filing jointly and surviving spouses) and \$156,900 (married filing separately).¹³ These threshold amounts are indexed for inflation.

The Joint Committee staff estimates that for the 2017 tax year approximately 104.8 million taxpayers will claim the standard deduction while 48.7 million taxpayers will elect to itemize deductions.

Tax liability

In general

A taxpayer's net income tax liability is the greater of (1) regular individual income tax liability reduced by credits allowed against the regular tax, or (2) tentative minimum tax reduced by credits allowed against the minimum tax. The amount of income subject to tax is determined differently under the regular tax and the alternative minimum tax, and separate rate schedules apply. Lower rates apply for long-term capital gains and certain dividends; those rates apply for both the regular tax and the alternative minimum tax.

¹² Sec. 67.

¹³ Sec. 68. This rule is sometimes referred to as the "Pease limitation." A taxpayer may not lose more than 80 percent of his or her deductions as a result of this provision.

Regular tax liability

To determine regular tax liability, a taxpayer generally must apply the tax rate schedules (or the tax tables) to his or her regular taxable income. The rate schedules are broken into several ranges of income, known as income brackets, with the marginal tax rate increasing as a taxpayer's income increases. Separate rate schedules apply based on an individual's filing status. For 2017, the regular individual income tax rate schedules are as follows:

Table 2.—Federal Individual Income Tax Rates for 2017

If taxable income is:	Then income tax equals:
<i>Single Individuals</i>	
Not over \$9,325	10% of the taxable income
Over \$9,325 but not over \$37,950	\$932.50 plus 15% of the excess over \$9,325
Over \$37,950 but not over \$91,900	\$5,226.25 plus 25% of the excess over \$37,950
Over \$91,900 but not over \$191,650	\$18,713.75 plus 28% of the excess over \$91,900
Over \$191,650 but not over \$416,700	\$46,643.75 plus 33% of the excess over \$191,650
Over \$416,700 but not over \$418,400	\$120,910.25 plus 35% of the excess over \$416,700
Over \$418,400	\$121,505.25 plus 39.6% of the excess over \$418,400
<i>Heads of Households</i>	
Not over \$13,350	10% of the taxable income
Over \$13,350 but not over \$50,800	\$1,335 plus 15% of the excess over \$13,350
Over \$50,800 but not over \$131,200	\$6,952.50 plus 25% of the excess over \$50,800
Over \$131,200 but not over \$212,500	\$27,052.50 plus 28% of the excess over \$131,200
Over \$212,500 but not over \$416,700	\$49,816.50 plus 33% of the excess over \$212,500
Over \$416,700 but not over \$444,550	\$117,202.50 plus 35% of the excess over \$416,700
Over \$444,550	\$126,950 plus 39.6% of the excess over \$444,550
<i>Married Individuals Filing Joint Returns and Surviving Spouses</i>	
Not over \$18,650	10% of the taxable income
Over \$18,650 but not over \$75,900	\$1,865 plus 15% of the excess over \$18,650
Over \$75,900 but not over \$153,100	\$10,452.50 plus 25% of the excess over \$75,900
Over \$153,100 but not over \$233,350	\$29,752.50 plus 28% of the excess over \$153,100
Over \$233,350 but not over \$416,700	\$52,222.50 plus 33% of the excess over \$233,350
Over \$416,700 but not over \$470,700	\$112,728 plus 35% of the excess over \$416,700
Over \$470,700	\$131,628 plus 39.6% of the excess over \$470,700

If taxable income is:	Then income tax equals:
<i>Married Individuals Filing Separate Returns</i>	
Not over \$9,325	10% of the taxable income
Over \$9,325 but not over \$37,950	\$932.50 plus 15% of the excess over \$9,325
Over \$37,950 but not over \$76,550	\$5,226.25 plus 25% of the excess over \$37,950
Over \$76,550 but not over \$116,675	\$14,876.25 plus 28% of the excess over \$76,550
Over \$116,675 but not over \$208,350	\$26,111.25 plus 33% of the excess over \$116,675
Over \$208,350 but not over \$235,350	\$56,364 plus 35% of the excess over \$208,350
Over \$235,350	\$65,814 plus 39.6% of the excess over \$235,350

An individual's effective marginal tax rate may be reduced by the allowance of a deduction equal to a percentage of income from certain domestic manufacturing activities.¹⁴

Special capital gains and dividends rates

In general, gain or loss reflected in the value of an asset is not recognized for income tax purposes until a taxpayer disposes of the asset. On the sale or exchange of a capital asset, any gain generally is included in income. Any net capital gain of an individual is taxed at maximum rates lower than the rates applicable to ordinary income. Net capital gain is the excess of the net long-term capital gain for the taxable year over the net short-term capital loss for the year. Gain or loss is treated as long-term if the asset is held for more than one year.

Capital losses generally are deductible in full against capital gains. In addition, individual taxpayers may deduct capital losses against up to \$3,000 of ordinary income in each year. Any remaining unused capital losses may be carried forward indefinitely to another taxable year.

A maximum rate applies to certain capital gains and dividends. Any adjusted net capital gain otherwise taxed at a 10- or 15-percent rate is taxed at a zero-percent rate. Adjusted net capital gain otherwise taxed at rates greater than 15 percent but less than 39.6 percent is taxed at a 15-percent rate. In addition, the maximum rate of tax on the adjusted net capital gain of an individual is 20 percent on any amount of gain that otherwise would be taxed at a 39.6-percent rate. These rates apply for purposes of both the regular tax and the alternative minimum tax. Qualified dividend income is generally taxed at the same rate as net capital gains.¹⁵

¹⁴ This deduction is described in more detail below in the summary of the tax rules applicable to corporations.

¹⁵ Qualified dividend income means dividends subject to certain source and holding period requirements, and is included in adjusted net capital gain. Sec. 1(h).

Net investment income

An additional tax is imposed on net investment income in the case of an individual, estate, or trust.¹⁶ In the case of an individual, the tax is 3.8 percent of the lesser of net investment income or the excess of modified adjusted gross income¹⁷ over the threshold amount. The threshold amount is \$250,000 in the case of a joint return or surviving spouse, \$125,000 in the case of a married individual filing a separate return, and \$200,000 in any other case.¹⁸ Thus, for taxpayers with modified adjusted gross income in excess of those thresholds, the rate on certain capital gains and dividends is 23.8 percent while the maximum rate on other investment income, including interest, annuities, royalties, and rents, is 43.4 percent.

Net investment income is the excess of (1) the sum of (a) gross income from interest, dividends, annuities, royalties, and rents, other than such income which is derived in the ordinary course of a trade or business that is not a passive activity with respect to the taxpayer or a trade or business of trading in financial instruments or commodities, and (b) net gain (to the extent taken into account in computing taxable income) attributable to the disposition of property other than property held in the active conduct of a trade or business that is not in the trade or business of trading in financial instruments or commodities, over (2) deductions properly allocable to such gross income or net gain.

Credits against tax

An individual may reduce his or her tax liability by any available tax credits.¹⁹ In some instances, a permissible credit is “refundable;” that is, if the amount of these credits exceeds tax liability (net of other credits), such credits create an overpayment, which may generate a refund. Two major refundable credits are the child tax credit and the earned income credit.²⁰

An individual may claim a tax credit for each qualifying child under age 17. The amount of the credit per child is \$1,000.²¹ The aggregate amount of child credits that may be claimed is phased out for individuals with income over certain threshold amounts. Specifically, the otherwise allowable child tax credit is reduced by \$50 for each \$1,000, or fraction thereof, of

¹⁶ Sec. 1411.

¹⁷ Modified adjusted gross income is adjusted gross income increased by the amount excluded from income as foreign earned income under section 911(a)(1) (net of the deductions and exclusions disallowed with respect to the foreign earned income).

¹⁸ These thresholds are not indexed for inflation.

¹⁹ These personal credits include the child tax credit, earned income tax credit, child and dependent care credit, adoption credit, premium tax credit, health coverage tax credit, saver’s credit, foreign tax credit, lifetime learning credit, American opportunity tax credit, residential energy efficient property credit (for qualifying solar energy property), and credits for the elderly or disabled.

²⁰ Other refundable credits include the American opportunity tax credit, the premium tax credit, and the health coverage tax credit.

²¹ Sec. 24.

modified adjusted gross income over \$75,000 for single individuals or heads of households, \$110,000 for married individuals filing jointly, and \$55,000 for married individuals filing separately. To the extent the child credit exceeds the taxpayer's tax liability, the taxpayer is eligible for a refundable credit (the additional child tax credit) equal to 15 percent of earned income in excess of \$3,000,²² not to exceed the maximum credit per child of \$1,000.

A refundable earned income tax credit ("EITC") is available to low-income workers who satisfy certain requirements.²³ The amount of the EITC varies depending on the taxpayer's earned income and whether the taxpayer has more than two, two, one, or no qualifying children. In 2017, the maximum EITC for taxpayers is \$6,318 with more than two qualifying children, \$5,616 with two qualifying children, \$3,400 with one qualifying child, and \$510 with no qualifying children. The credit amount begins to phase out at an income level of \$23,930 for joint-filers with children, \$18,340 for other taxpayers with children, \$13,930 for joint-filers with no qualifying children, and \$8,340 for other taxpayers with no qualifying children. The phase-out percentages are 21.06 for two or more qualifying children, 15.98 for taxpayers with one qualifying child, and 7.65 for no qualifying children.

Tax credits are also allowed for certain business expenditures, certain foreign income taxes paid or accrued, certain energy conservation expenditures, certain education expenditures, certain child care expenditures, and for certain elderly or disabled individuals. The personal credits allowed against the regular tax are generally allowed against the alternative minimum tax.

Alternative minimum tax liability

An alternative minimum tax is imposed on an individual, estate, or trust in an amount by which the tentative minimum tax exceeds the regular income tax for the taxable year.²⁴ For 2017, the tentative minimum tax is the sum of (1) 26 percent of so much of the taxable excess as does not exceed \$187,800 (\$93,900 in the case of married filing separately) and (2) 28 percent of the remaining taxable excess. The taxable excess is so much of the alternative minimum taxable income ("AMTI") as exceeds the exemption amount. The breakpoint between the 26-percent and 28-percent bracket is indexed for inflation. The maximum tax rates on net capital gain and dividends used in computing the regular tax are used in computing the tentative minimum tax. AMTI is the taxpayer's taxable income increased by the taxpayer's tax preferences and adjusted by determining the tax treatment of certain items in a manner that negates the deferral of income resulting from the regular tax treatment of those items.

For tax year 2017, the exemption amount is \$84,500 for married individuals filing jointly and surviving spouses, \$54,300 for other unmarried individuals, \$42,250 for married individuals filing separately, and \$24,100 for estates or trusts. The exemption amount is phased out by an

²² Families with three or more children may determine the additional child tax credit by taking the greater of (1) the earned income formula, or (2) the alternative formula, *i.e.* the amount by which the taxpayer's social security taxes exceed the taxpayer's earned income tax credit.

²³ Sec. 32.

²⁴ Sec. 55.

amount equal to 25 percent of the amount by which the individual's AMTI exceeds \$160,900 for married individuals filing jointly and surviving spouses, \$120,700 for other unmarried individuals, and \$80,450 for married individuals filing separately, estates, or trusts. These amounts are indexed annually for inflation.

Among the tax preferences and adjustments included in AMTI are accelerated depreciation on certain property used in a trade or business, circulation expenditures, research and experimental expenditures, certain expenses and allowances related to oil and gas, certain expenses and allowances related to mining exploration and development, certain tax-exempt interest income, and a portion of the gain excluded with respect to the sale or disposition of certain small business stock. Personal exemptions, the standard deduction, and certain itemized deductions, such as State and local taxes and miscellaneous deductions, are not allowed to reduce AMTI.

B. Corporate Income Tax

Taxable income

Corporations organized under the laws of any of the 50 States (and the District of Columbia) generally are subject to the U.S. corporate income tax on their worldwide taxable income.²⁵ Under subchapter S of the Code, a qualified small business corporation may elect not to be subject to the corporate income tax (*i.e.*, may make an “S corporation election”). If an S corporation election is made, the income of the corporation will flow through to the shareholders and be taxable directly to the shareholders.

The taxable income of a corporation generally is its gross income less allowable deductions. Gross income generally is income derived from any source, including gross profit from the sale of goods and services to customers, rents, royalties, interest (other than interest from certain indebtedness issued by State and local governments), dividends, gains from the sale of business and investment assets, and other income.

Allowable deductions include ordinary and necessary business expenditures, such as salaries, wages, contributions to profit-sharing and pension plans and other employee benefit programs, repairs, bad debts, taxes (other than Federal income taxes), contributions to charitable organizations (subject to an income limitation), advertising, interest expense, certain losses, selling expenses, and other expenses. Expenditures that produce benefits in future taxable years to a taxpayer’s business or income-producing activities (such as the purchase of plant and equipment) generally are capitalized and recovered over time through depreciation, amortization or depletion allowances. In some instances taxpayers can recover their costs more quickly than under the general rules. An additional first-year depreciation deduction is allowed equal to 50 percent of the adjusted basis of qualified property.²⁶ Also, a taxpayer may elect to deduct (or “expense”) up to \$500,000 of the cost of certain qualifying property placed in service during the taxable year.²⁷

A net operating loss incurred in one taxable year may be carried back two years or carried forward 20 years. Deductions are also allowed for certain amounts despite the lack of a direct expenditure by the taxpayer. For example, a deduction is allowed for all or a portion of the amount of dividends received by a corporation from another corporation (provided certain ownership requirements are satisfied). Moreover, a deduction is allowed for a portion of the amount of income attributable to certain manufacturing activities.²⁸

²⁵ A foreign corporation generally is subject to the U.S. corporate income tax only on income with a sufficient nexus to the United States.

²⁶ Sec. 168(k).

²⁷ This amount is reduced (but not below zero) by the amount by which the cost of qualifying property exceeds \$2,000,000. Sec. 179.

²⁸ Deductions of income amounts can be viewed as substitutes for exemption or rate reductions for the affected income.

Certain expenditures may not be deducted, such as dividends paid to shareholders, expenses associated with earning tax-exempt income,²⁹ certain entertainment expenditures, certain executive compensation in excess of \$1,000,000 per year, a portion of the interest on certain high-yield debt obligations that resemble equity, as well as fines, penalties, bribes, kickbacks and illegal payments.

Tax liability

A corporation’s regular income tax liability generally is determined by applying the following tax rate schedule to its taxable income.

Table 3.–Federal Corporate Income Tax Rates

If taxable income is:	Then the income tax rate is:
\$0-\$50,000	15 percent of taxable income
\$50,001-\$75,000	25 percent of taxable income
\$75,001-\$10,000,000	34 percent of taxable income
Over \$10,000,000	35 percent of taxable income

The first two graduated rates described above are phased out for corporations with taxable income between \$100,000 and \$335,000 (at a marginal rate of 39 percent). As a result, a corporation with taxable income between \$335,000 and \$10,000,000 is effectively subject to a flat tax rate of 34 percent. Also, the application of the 34-percent rate is gradually phased out for corporations with taxable income between \$15,000,000 and \$18,333,333 (at a marginal rate of 38 percent), such that a corporation with taxable income of \$18,333,333 or more is effectively subject to a flat rate of 35 percent.

In contrast to the treatment of capital gains in the individual income tax, no separate rate structure exists for corporate capital gains. Thus, the maximum rate of tax on the net capital gains of a corporation is 35 percent. A corporation may not deduct the amount of capital losses in excess of capital gains for any taxable year. Disallowed capital losses may be carried back three years or carried forward five years.

Corporations are taxed at lower rates on income from certain domestic production activities. This rate reduction is effected by the allowance of a deduction equal to a percentage

²⁹ For example, the carrying costs of tax-exempt State and local obligations and the premiums on certain life insurance policies are not deductible.

of qualifying domestic production activities income. The deduction is generally equal to nine percent of the income from manufacturing, construction, and certain other specified activities.³⁰

Like individuals, corporations may reduce their tax liability by any applicable tax credits.³¹ The three largest dollar amount credits are the research credit, the low income housing tax credit, and the renewable electricity production credit, which target intangible investment, real property investment, and production respectively.³²

The research credit is generally available with respect to incremental increases in qualified research.³³ A research tax credit is also available with respect to corporate cash expenses paid for basic research conducted by universities (and certain nonprofit scientific research organizations) above a certain floor.³⁴ Finally, a research credit is available for a taxpayer's expenditures on research undertaken by an energy research consortium.³⁵

The low-income housing tax credit may be claimed over a 10-year period by owners of certain residential rental property for the cost of rental housing occupied by tenants having incomes below specified levels.³⁶ The amount of the credit for any taxable year in the credit period is the applicable percentage of the qualified basis of each qualified low-income building. The qualified basis of any qualified low-income building for any taxable year equals the applicable fraction of the eligible basis of the building.

An income tax credit is allowed for the production of electricity from qualified energy resources at qualified facilities (the "renewable electricity production credit"). Qualified energy resources comprise wind, closed-loop biomass, open-loop biomass, geothermal energy, solar

³⁰ With a nine percent deduction, a corporation is taxed at a rate of 35 percent on only 91 percent of qualifying income, resulting in an effective tax rate of $0.91 * 35$, or 31.85 percent. A similar reduction applies to the graduated rates applicable to individuals with qualifying domestic production activities income.

³¹ Business credits also apply to the business income of individuals.

³² See Joint Committee on Taxation, *Estimates of Federal Tax Expenditures For Fiscal Years 2016-2020* (JCX-3-17), January 30, 2017.

³³ For general research expenditures, a taxpayer may claim a research credit equal to 20 percent of the amount by which the taxpayer's qualified research expenses for a taxable year exceed its base amount for that year. Sec. 41(a)(1). An alternative simplified research credit (with a 14 percent rate and a different base amount) may be claimed in lieu of this credit. Sec. 41(c)(5).

³⁴ This 20-percent credit is available with respect to the excess of (1) 100 percent of corporate cash expenses (including grants or contributions) paid for basic research conducted by universities (and certain nonprofit scientific research organizations) over (2) the sum of (a) the greater of two minimum basic research floors plus (b) an amount reflecting any decrease in nonresearch giving to universities by the corporation as compared to such giving during a fixed-base period adjusted for inflation. Sec. 41(a)(2) and (e).

³⁵ This separate credit computation commonly is referred to as the energy research credit. Unlike the other research credits, the energy research credit applies to all qualified expenditures, not just those in excess of a base amount. Sec. 41(1)(3).

³⁶ Sec. 42.

energy, small irrigation power, municipal solid waste, qualified hydropower production, and marine and hydrokinetic renewable energy. Qualified facilities are, generally, facilities that generate electricity using qualified energy resources. To be eligible for the credit, electricity produced from qualified energy resources at qualified facilities must be sold by the taxpayer to an unrelated person.³⁷

In addition there are credits applicable to businesses including credits for biofuels, investment tax credits (applicable to investment in certain renewable energy property and the rehabilitation of certain real property), the empowerment zone employment credit (applicable to wages paid to certain residents of, or employees in, empowerment zones), the work opportunity credit (applicable to wages paid to individuals from certain targeted groups), and the disabled access credit (applicable to expenditures by certain small businesses to make the businesses accessible to disabled individuals).³⁸ Unused credits generally may be carried back one year and carried forward twenty years.

Foreign tax credits generally are available against U.S. income tax imposed on foreign source income to the extent of foreign income taxes paid on that income. Foreign income taxes limited in a tax year may be carried back one year or forward ten years.

Affiliated group

Domestic corporations that are affiliated through 80 percent or more corporate ownership may elect to file a consolidated return in lieu of filing separate returns. Corporations filing a consolidated return generally are treated as a single corporation; thus, the losses of one corporation can offset the income (and thus reduce the otherwise applicable tax) of other affiliated corporations.

Minimum tax

A corporation is subject to an alternative minimum tax that is payable, in addition to all other tax liabilities, to the extent that it exceeds the corporation's regular income tax liability. The tax is imposed at a flat rate of 20 percent on alternative minimum taxable income in excess of a \$40,000 exemption amount.³⁹ Credits that are allowed to offset a corporation's regular tax liability generally are not allowed to offset its minimum tax liability. If a corporation pays the alternative minimum tax, the amount of the tax paid is allowed as a credit against the regular tax in future years.

Alternative minimum taxable income is the corporation's taxable income increased by the corporation's tax preferences and adjusted by determining the tax treatment of certain items

³⁷ Sec. 45.

³⁸ Certain of these credits are scheduled to expire in 2017 or later. For more information on expiring provisions of the Code, see Joint Committee on Taxation, *List of Expiring Federal Tax Provisions 2016-2026* (JCX-1-17), January 4, 2017.

³⁹ The exemption amount is phased out for corporations with income above a certain threshold, and is completely phased out for corporations with alternative minimum taxable income of \$310,000 or more.

in a manner that negates the deferral of income resulting from the regular tax treatment of those items. Among the preferences and adjustments applicable to the corporate alternative minimum tax are accelerated depreciation on certain property, certain expenses and allowances related to oil and gas, certain expenses and allowances related to mining exploration and development, certain amortization expenses related to pollution control facilities, and certain tax-exempt interest income. In addition, corporate alternative minimum taxable income is increased by 75 percent of the amount by which the corporation's "adjusted current earnings" exceed its alternative minimum taxable income (determined without regard to this adjustment). Adjusted current earnings generally are determined with reference to the rules that apply in determining a corporation's earnings and profits.

Treatment of corporate distributions

The taxation of a corporation generally is separate and distinct from the taxation of its shareholders. A distribution by a corporation to one of its shareholders generally is taxable as a dividend to the shareholder to the extent of the corporation's current or accumulated earnings and profits.⁴⁰ Thus, the amount of a corporate dividend generally is taxed twice: once when the income is earned by the corporation and again when the dividend is distributed to the shareholder.⁴¹ Conversely, amounts paid as interest to the debtholders of a corporation generally are subject to only one level of tax (at the recipient level) since the corporation generally is allowed a deduction for the amount of interest expense paid or accrued.

Amounts received by a shareholder in complete liquidation of a corporation generally are treated as full payment in exchange for the shareholder's stock. A liquidating corporation recognizes gain or loss on the distributed property as if such property were sold to the distributee for its fair market value. However, if a corporation liquidates a subsidiary corporation of which it has 80 percent or more control, no gain or loss generally is recognized by either the parent corporation or the subsidiary corporation.

Accumulated earnings and personal holding company taxes

Taxes at a rate of 20 percent (the top rate generally applicable to dividend income of individuals) may be imposed on the accumulated earnings or personal holding company income of a corporation. The accumulated earnings tax may be imposed if a corporation retains earnings in excess of reasonable business needs. The personal holding company tax may be imposed on the excessive passive income of a closely held corporation. The accumulated earnings tax and the personal holding company tax, when they apply, in effect impose the shareholder-level tax in

⁴⁰ A distribution in excess of the earnings and profits of a corporation generally is a tax-free return of capital to the shareholder to the extent of the shareholder's adjusted basis (generally, cost) in the stock of the corporation; such distribution is a capital gain if in excess of basis. A distribution of property other than cash generally is treated as a taxable sale of such property by the corporation and is taken into account by the shareholder at the property's fair market value. A distribution of stock of the corporation generally is not a taxable event to either the corporation or the shareholder.

⁴¹ This double taxation is mitigated by a reduced tax rate generally applicable to the qualified dividend income of individuals.

addition to the corporate-level tax on accumulated earnings or undistributed personal holding company income.

C. Estate, Gift and Generation-Skipping Transfer Taxes

The United States generally imposes a gift tax on any transfer of property by gift made by a U.S. citizen or resident, whether made directly or indirectly and whether made in trust or otherwise. Nonresident aliens are subject to the gift tax with respect to transfers of tangible real or personal property where the property is located in the United States at the time of the gift. The gift tax is imposed on the donor and is based on the fair market value of the property transferred. Deductions are allowed for certain gifts to spouses and to charities. Annual gifts of \$14,000 (for 2017) or less per donor and per donee generally are not subject to tax.

An estate tax also is imposed on the taxable estate of any person who was a citizen or resident of the United States at the time of death, and on certain property belonging to a nonresident of the United States that is located in the United States at the time of death. The estate tax is imposed on the estate of the decedent and generally is based on the fair market value of the property passing at death.⁴² The taxable estate generally equals the worldwide gross estate less certain allowable deductions, including a marital deduction for certain bequests to the surviving spouse of the decedent and a deduction for certain bequests to charities.

The gift and estate taxes are unified such that a single graduated rate schedule and effective exemption amount apply to an individual's cumulative taxable gifts and bequests. The unified estate and gift tax rates begin at 18 percent on the first \$10,000 in cumulative taxable transfers and reach 40 percent on cumulative taxable transfers over \$1,000,000. A unified credit of \$2,141,800 (for 2017) is available with respect to taxable transfers by gift or at death. This credit effectively exempts a total of \$5.49 million (for 2017)⁴³ in cumulative taxable transfers from the gift tax or the estate tax. The unified credit thus generally also has the effect of rendering the marginal rates below 40 percent inapplicable. Unused exemption as of the death of a spouse generally is available for use by the surviving spouse; this feature of the law sometimes is referred to as exemption portability.

A separate transfer tax is imposed on generation-skipping transfers in addition to any estate or gift tax that is normally imposed on such transfers. This tax generally is imposed on transfers, either directly or through a trust or similar arrangement, to a beneficiary in more than one generation below that of the transferor. For 2017, the generation-skipping transfer tax is imposed at a flat rate of 40 percent on generation-skipping transfers in excess of \$5.49 million.

⁴² In addition to interests in property owned by the decedent at the time of death, the Federal estate tax also is imposed on: (1) life insurance that was either payable to the decedent's estate or in which the decedent had an incident of ownership at death; (2) property over which the decedent had a general power of appointment at death; (3) annuities purchased by the decedent or his employer that were payable to the decedent before death; (4) property held by the decedents as joint tenants; (5) property transferred by the decedent before death in which the decedent retained a life estate or over which the decedent had the power to designate who will possess or enjoy the property; (6) property revocably transferred by the decedent before death; and (7) certain transfers taking effect at the death of the decedent.

⁴³ The \$5 million exemption amount set forth in section 2010(c)(3)(A) is indexed for inflation for years after 2011. Sec. 2010(c)(3)(B).

D. Social Insurance Taxes

In general

Social Security benefits and certain Medicare benefits are financed primarily by payroll taxes on covered wages. The Federal Insurance Contributions Act (“FICA”) imposes tax on employers based on the amount of wages paid to an employee during the year. The tax imposed is composed of two parts: (1) the old age, survivors, and disability insurance (“OASDI”) tax equal to 6.2 percent of covered wages up to the taxable wage base (\$127,200 in 2017); and (2) the Medicare hospital insurance (“HI”) tax amount equal to 1.45 percent of covered wages with no wage cap. In addition to the tax on employers, each employee is subject to FICA taxes equal to the amount of tax imposed on the employer. The employee level tax generally must be withheld and remitted to the Federal government by the employer.⁴⁴

As a parallel to FICA taxes, the Self-Employment Contributions Act (“SECA”) imposes taxes on the net income from self-employment of self-employed individuals. The rate of the OASDI portion of SECA taxes is equal to the combined employee and employer OASDI FICA tax rates and applies to self-employment income up to the FICA taxable wage base. Similarly, the rate of the HI portion is the sum of the combined employer and employee HI rates and there is no cap on the amount of self-employment income to which the rate applies.⁴⁵

In addition to FICA taxes, employers are subject to a Federal unemployment insurance payroll tax equal to six percent of the total wages of each employee (up to \$7,000) on covered employment. Employers are eligible for a Federal credit equal to 5.4 percent for State unemployment taxes, yielding a 0.6 percent effective tax rate. Federal unemployment insurance payroll taxes are used to fund programs maintained by the States for the benefit of unemployed workers.

Additional hospital insurance tax on certain high-income individuals

The employee portion of the HI tax is increased by an additional tax of 0.9 percent on wages received in excess of a specific threshold amount.⁴⁶ However, unlike the general 1.45 percent HI tax on wages, this additional tax is on the combined wages of the employee and the employee’s spouse, in the case of a joint return. The threshold amount is \$250,000 in the case of

⁴⁴ Instead of FICA taxes, railroad employers and employees are subject, under the Railroad Retirement Tax Act (“RRTA”), to taxes equivalent to the OASDI and HI taxes under FICA. Under RRTA, employers and employees are also subject to an additional tax, referred to as the “tier 2” tax, on compensation up to a certain amount.

⁴⁵ For purposes of computing net earnings from self-employment, taxpayers are permitted a deduction equal to the product of the taxpayer’s earnings (determined without regard to this deduction) and one-half of the sum of the rates for OASDI (12.4 percent) and HI (2.9 percent), *i.e.*, 7.65 percent of net earnings. This deduction reflects the fact that the FICA rates apply to an employee’s wages, which do not include FICA taxes paid by the employer, whereas a self-employed individual’s net earnings are economically equivalent to an employee’s wages plus the employer share of FICA taxes.

⁴⁶ Sec. 3101(b), as amended by the Patient Protection and Affordable Care Act (“PPACA”), Pub. L. No. 111-148.

married filing jointly, \$125,000 in the case of married filing separately, and \$200,000 in any other case (unmarried individual, head of household or surviving spouse).⁴⁷

The same additional HI tax applies to the HI portion of SECA tax on self-employment income in excess of the threshold amount. Thus, an additional tax of 0.9 percent is imposed on every self-employed individual on self-employment income in excess of the threshold amount.⁴⁸

⁴⁷ These threshold amounts are not indexed for inflation.

⁴⁸ Sec. 1402(b).

E. Major Excise Taxes

The Federal tax system imposes excise taxes on selected goods and services. Generally, excise taxes are taxes imposed on a per unit or *ad valorem* (i.e., percentage of price) basis on the production, importation, or sale of a specific good or service. Among the goods and services subject to U.S. excise taxes are motor fuels, alcoholic beverages, tobacco products, firearms, air and ship transportation, certain environmentally hazardous products (e.g., the tax on ozone depleting chemicals, and a tax on crude oil and certain petroleum products to fund the Oil Spill Liability Trust Fund), coal, certain telephone communications (e.g. local service), certain wagers, indoor tanning services, and vehicles lacking in fuel efficiency.⁴⁹ Additionally, an annual fee is imposed on health insurers and on certain manufacturers and importers of branded prescription drugs. The largest excise taxes in terms of revenue are those for gasoline motor fuel (\$26.1 billion collected in fiscal year 2016),⁵⁰ diesel motor fuel (\$10.3 billion),⁵¹ and domestic air tickets (\$9.9 billion).⁵² In fiscal year 2015, the latest fiscal year for which data is publicly available, \$13.6 billion was collected on the excise tax on domestic cigarettes.⁵³

Revenues from certain Federal excise taxes are dedicated to trust funds (e.g., the Highway Trust Fund) for designated expenditure programs, and revenues from other excise taxes (e.g., alcoholic beverages) go to the General Fund for general purpose expenditures.

⁴⁹ For a description of the various Federal excise taxes, see Joint Committee on Taxation, *Present Law and Background Information on Federal Excise Taxes* (JCX-99-15), July 13, 2015.

Table 4.–2017 Federal Excise Tax Rates for Selected Taxed Products or Services

Gasoline Motor Fuel	18.3 cents per gallon ⁵⁴
Diesel Motor Fuel	24.3 cents per gallon ⁵⁵
Cigarettes	\$50.33 per thousand small cigarettes; \$105.69 per thousand large cigarettes.
Domestic Air Tickets	7.5 percent of fare, plus \$4.10 (2017) per domestic flight segment generally.

⁵⁴ This rate does not include the additional 0.1 cent per gallon to fund the Leaking Underground Storage Tank Trust Fund.

⁵⁵ This rate does not include the additional 0.1 cent per gallon to fund the Leaking Underground Storage Tank Trust Fund.

[1] Social insurance taxes comprise old-age and survivors insurance, disability insurance, hospital insurance, railroad retirement, railroad social security equivalent account, employment insurance, employee share of Federal employees retirement, and certain non-Federal employees retirement.

[2] Other receipts are primarily composed of (1) customs duties and fees, and (2) deposits of earnings by the Federal Reserve system.

[3] Data for FY1967-2015 comes from OMB historical tables (not yet updated with data for FY2016); FY2016 data comes from Monthly Treasury Statement of Receipts and Outlays.

[1] Social insurance taxes comprise old-age and survivors insurance, disability insurance, hospital insurance, railroad retirement, railroad social security equivalent account, employment insurance, employee share of Federal employees retirement, and certain non-Federal employees retirement.

[2] Other receipts are primarily composed of (1) customs duties and fees, and (2) deposits of earnings by the Federal Reserve system.

[3] Data for FY1967-2015 comes from OMB historical tables (not yet updated with data for FY2016); FY2016 data comes from Monthly Treasury Statement of Receipts and Outlays and BEA quarterly GDP releases.

Sources: Office of Management and Budget, Historical Tables, Budget of the U.S. Government, Fiscal Year 2017; Department of the Treasury, Bureau of the Fiscal Service, Final Monthly Treasury Statement of Receipts and Outlays, Fiscal Year 2016 through September 30, 2016; Bureau of Economic Analysis Gross Domestic Product, Seasonally adjusted at annual rates; Joint Committee on Taxation staff calculations.

2015 [3]	\$118,500	7.65	6.2	1.45	15.3	12.4	2.9
2016 [3]	\$118,500	7.65	6.2	1.45	15.3	12.4	2.9
2017 [3]	\$127,200	7.65	6.2	1.45	15.3	12.4	2.9

[1] For 1984 only, employees were allowed a credit of 0.3 percent of taxable wages against their FICA tax liability, reducing the effective rate to 6.7 percent.

[2] The Tax Relief, Unemployment Reauthorization, and Job Creation Act of 2010 reduced the FICA tax rate for employees by two percentage points for 2011. Specifically, the employer OASDI rate remains at 6.2 while the employee rate is reduced to 4.2. Equivalent reductions were made to the SECA tax. Subsequent legislation extended that treatment to 2012.

[3] For 2013, and subsequent years, an additional employee HI tax of 0.9 percent applies to wages in excess of \$250,000 for married taxpayers filing jointly (\$125,000 for married taxpayers filing separately) and \$200,000 in all other cases. Equivalent increases were made to the SECA tax. For wages in excess of the threshold in these years, the HI contribution rate is 2.35 percent for employees and 3.8 percent for self-employed persons, and the total HI and OASDI contribution rate is 8.55 percent (not the corresponding rates reflected in the table).

[1] The income concept used to place tax returns into income categories is adjusted gross income (AGI) plus: (1) tax-exempt interest,

(2) employer contributions for health plans and life insurance, (3) employer share of FICA tax, (4) worker's compensation,

(5) nontaxable Social Security benefits, (6) insurance value of Medicare benefits, (7) alternative minimum tax preference items,

(8) individual share of business taxes, and (9) excluded income of U.S. citizens living abroad. Categories are measured at 2017 levels.

[2] Includes nonfilers, excludes dependent filers and returns with negative income.

[3] Federal taxes are equal to individual income tax (including the outlay portion of refundable credits), employment tax (attributed to employees),

excise taxes (attributed to consumers), and corporate income taxes. The estimates of Federal taxes are preliminary and subject to change.

Individuals who are dependents of other taxpayers and taxpayers with negative income are excluded from the analysis.

Does not include indirect effects.

[4] The average tax rate is equal to Federal taxes described in footnote [3] divided by income described in footnote [2].

Categories are measured at 2017 levels.

[2] For individual income and employment taxes, the average marginal tax rate is equal to the change in taxes from an additional \$100 of wages to each spouse with positive wages. For long-term capital gain, the average marginal tax rate equals the change in taxes from an additional 1% increase in long-term capital gains to each taxpayer with positive long-term capital gains.
